Information Services Today Sandra Hirsh, 2018-03-02 This second edition of Information Services Today An Introduction demonstrates the ever changing landscape of information services today and the need to re evaluate curriculum

competency training and one's personal learning network in order to stay abreast of current trends and issues and more significantly remain competent to address the changing user needs of the information community. Specifically, the book provides a thorough introduction, history, and overall state of the field; gives a diverse and global perspective of what it means to be a library and information professional today; addresses why information organizations and information and technological literacy are more important today than ever before; discusses how technology has influenced the ways that information professionals provide information resources and services in today's digital environment; highlights current issues and trends; and provides expert insight into emerging challenges, innovations, and opportunities for the future, and identifies career management strategies and leadership opportunities in the information profession. The new edition features chapter updates to address changes in information services, introducing new topics such as strategic planning, change management, design thinking, advocacy, and data management and analysis, and includes new contributing authors. The book begins with an overview of libraries and their transformation as information and technological hubs within their local and digital communities. It covers the various specializations within the field, emphasizing the exciting yet complex roles and opportunities for information professionals in a variety of information environments. With that foundation in place, it presents the fundamentals of information services, delves into management skills needed by information professionals today, and explores emerging issues related to the rapid development of new technologies. The book addresses how libraries and information centers serve different kinds of communities, highlighting the unique needs of increasingly diverse users and how information organizations and information professionals work to fulfill those needs. This book provokes discussion, critical thinking, and interaction to facilitate the learning process. The content and supplemental materials, discussion questions, rich sets of online accessible materials, multimedia, webcast interviews featuring authors from this book discussing the trends and issues in their respective areas, and chapter presentation slides for use by instructors, give readers the opportunity to develop a deeper understanding of and engagement with the topics. Additionally, this book recognizes the broad range of environments that people with Master of Library and Information Science (MLIS) degrees work in, which include both libraries and other information environments. Thus, this book does not only focus on libraries but instead encompasses ALL kinds of information organizations.

Open Source Technology: Concepts, Methodologies, Tools, and Applications

Management Association, Information Resources, 2014-11-30. The pervasiveness of and universal access to modern Information and Communication Technologies has enabled a popular new paradigm in the dissemination of information, art, and ideas. Now, instead of relying on a finite number of content providers to control the flow of information, users can generate and disseminate their own content for a wider audience. Open Source Technology: Concepts, Methodologies, Tools, and Applications investigates examples and methodologies in user-generated and freely accessible content available through electronic and online media. With applications in education, government, entertainment, and more, the technologies explored in
