Lesson 2: Moving Secrets**EXPLORE:**

Earth is the only planet so far known to support life. It is 70% water and 30% land. But beneath what we see are layers of characteristically solid, molten, and semi-molten rocks, magma, minerals, and elements. In this activity, you will investigate the inner layers of the Earth as well as its discontinuities, and make a three-dimensional model of them.

Activity #1: Our Dynamic Earth

Describe the properties of the layers of the Earth using the information you've done in the previous activity. Tell the composition of the layers of the Earth.

Guide Questions:

1. What element is the most abundant in the Earth's crust?
2. What elements make up the most of the mantle?
3. What is the special feature of the upper mantle?
4. How did scientists come to know that the outer core is liquid? Provide evidences to your answer.
5. What materials make up the inner core?
6. Is the inner core solid, liquid, or gas? What keeps it in this phase?
7. Compare the inner core and the outer core.
