Staines,2019-03-04 This is a complete revision with new material of the second edition of Social Sciences Research Research Writing and Presentation Strategies for Students Scarecrow Press 2008 There have been significant changes in the research process in the social sciences since the second edition of this text was published in 2008 a decade ago The plethora of new information technologies e g smart phones tablets apps etc the information overload not only on the Internet where anyone can publish but also with the explosion of social media e g Twitter Facebook Instagram etc as well as the far reaching changes in databases and other sources of electronic information that is available Complementing the manual are appendixes consisting of a list of possible research questions an example paper a complete set of worksheets and blank citation forms to be used to record references which provide further practice for students In this third edition the author has included more instruction on searches using electronic sources as well as new formatting guidelines that have been promulgated in the past several years The ideal resource for college students this manual addresses the finer points of research and writing that are not given enough instruction in the classroom **12 YEAR-WISE CTET Paper 2 (Mathematics & Science) Solved Papers (2011 - 2019) - 2nd English Edition** Disha Experts,2019-09-06

Optimizing Hyperparameters for Machine Learning Algorithms in Production Jonathan Krauß,2022-04-13 Machine learning ML offers the potential to train data based models and therefore to extract knowledge from data Due to an increase in networking and digitalization data and consequently the application of ML are growing in production The creation of ML models includes several tasks that need to be conducted within data integration data preparation modeling and deployment One key design decision in this context is the selection of the hyperparameters of an ML algorithm regardless of whether this task is conducted manually by a data scientist or automatically by an AutoML system Therefore data scientists and AutoML systems rely on hyperparameter optimization HPO techniques algorithms that automatically identify good hyperparameters for ML algorithms The selection of the HPO technique is of great relevance since it can improve the final performance of an ML model by up to 62 % and reduce its errors by up to 95 % compared to computing with default values As the selection of the HPO technique depends on different domain specific influences it becomes more and more popular to use decision support systems to facilitate this
