Midterm Study Guide

Why Geography?

- Geography considers a world whose political, cultural, economic, and technological bases are constantly changing; they are always moving
- A perspective that emphasizes local context and pays attention to the place from which knowledges are produced and phenomena are viewed
- A perspective that looks at connectivities across bounded spaces like states
- A method that can be employed to either further or challenge dominant power relations
- A discipline that straddles and synthesizes the insights of the humanities, social sciences, and hard sciences.

Week 1: Sense of Place (Global Cultures)

Senses of Place

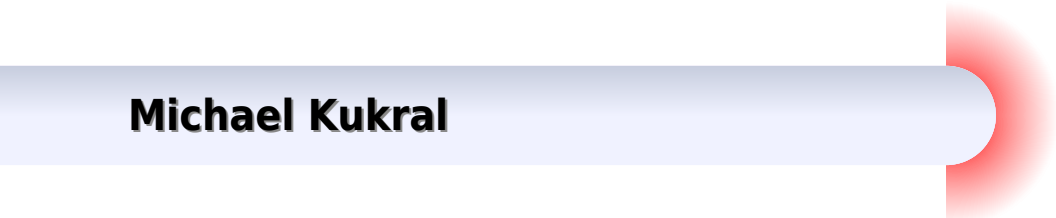

- Space as a three-dimensional geometric space
- Place as the experience of long-term dwelling
 - "Place is a special kind of object. It is a concretion of value, though not a valued thing that can be handled or carried easily; it is an object in which one can dwell."
- We make the world our home in part through the experience of places
- Sensing place through smell, sight, hearing, taste, and touch
 - All these senses help us develop an intimate, experienced understanding of particular places
 - Example: Tuvan's using sound to express a sense of place
- Places can be tied to certain people, but their character and history
 - Toponyms help bolster national place, by defining the "sorts of people" that live in them

Reactionary Sense of Place

- Belonging, rootedness, authenticity, heritage, mystical bonds
 - These terms risk to be connected to a very exclusive experience
- Place, Memory, Media
 - Heimat: 1930's displayed the prosperity and excitement in the German countryside, but what about the victims on the other side of it?
 - Memory is selective. Memory is partial. Memory is amoral
 - Graubünden, a Swiss traveling website tries to capture place by highlighting best parts of the country to potential tourists and travelers
- Our connections to place can lead to a sense of reactive inclusivity that can be related to

Political Geography Study Guide:

Geography, Study Guide Harm J. de Blij, Peter O. Muller, 1994-01-26 A penetrating look at the geographical framework of the contemporary world using the geographic perspective and geography's spatial terminology to investigate the globe's great geographic regions. Features complete balanced and in depth coverage of human culture, historical, physical and economic geography along with the very latest developments and implications. As in previous editions, this one contains outstanding illustrative materials including over 200 detailed maps. Geography, Study Guide Peter O. Muller, Elizabeth

Muller-Hames, 2005-11-29 Study Guide to accompany *Geography: Realms, Regions and Concepts* 12th Edition provides readers with a spatial understanding of the human and physical characteristics of the earth and is by nature an integrative discipline that challenges readers to consider the relationships between natural and human variables. They will learn to think critically about the interdependency of the earth's systems and make informed decisions about a variety of highly relevant environmental, cultural and economic topics such as globalization, global warming, deforestation, economic development and resource use. The Human Mosaic Student Study Guide Michael Kukral, 2005-08-19 The updated Student Study Guide provides a tremendous learning advantage for students using *The Human Mosaic*. Geography: Regions and Concepts, Study Guide Harm J. de Blij, Peter O. Muller, 1991-01-18 This solid introduction provides an overview of world regional geography and is strongly grounded in spatial concepts and linked to basic systematic geography. Organized according to developed and less developed regions, it covers the human and physical foundations of world geography: Europe, the Soviet Union, North America, Australia, Japan, Middle and South America, Africa, Southwest Asia, South Asia, China and Southeast Asia. As with previous editions, the Sixth Edition features outstanding illustrative material and a full color cartographic program but also incorporates four major chapter revisions, substantial updating and new chapter on opening maps. Among the major topics covered are regional concepts and classification, culture and landscape and physical environmental dimensions. Specifics for each region are also discussed such as changing natural environment, history, settlement, population, politics, economics and their impact, industrialization and urbanization, environmental hazards and much more. **Educational**
