Polycom® Touch Control

Telepresence at your fingertips

The intuitive solution for accelerating unified Communications (UC) and system optimization throughout your organization. The Polycom® Touch Control provides instant solutions to highly complex touch-screen issues that would take hours to solve through traditional interface or technical support. By simplifying user experience of collaboration and allowing participants to focus on their meeting, the Polycom® Touch Control solution goes beyond other touch and navigation technologies and adds controls that make your organization more productive and efficient.

Conference with confidence

The Polycom® Touch Control interface is ideal for enterprise, virtual and institutional multi-user environments, and any other group working together and using software applications. Featuring a high-resolution display that provides a tactile response and easy navigation, the Polycom® Touch Control solution gives users the control of aspects of their collaboration adjusted for meeting/working languages, allowing users to move content.

Users can easily control the meeting using a series of touch gestures, including zoom, pan, scroll and other gestures that make moving the screen effortless. The Polycom® Touch Control solution works with the Polycom® HDX and RealPresence® Group Series (with enterprise edition) software, which can be integrated with Microsoft® Exchange® servers or hosted Exchange environments.

The Polycom® Touch Control offers multiple options for integration with existing video or video-capable IP or H.323 endpoints or direct SIP connection to the Touch Control via Polycom® endpoints or the video server. Or, host content directly from H.323 RealPresence endpoints via Touch Control.

Easy to use and deploy

The Polycom® Touch Control Series provides users with a simple, intuitive interface that is easy to learn and use. The Polycom® Touch Control Series is easy to install and can be connected to a RealPresence® Group Series video conferencing system. Polycom® Touch Control devices can be deployed in a meeting room configured to provide users with a consistent, intuitive experience of collaboration. Or, devices can be connected to video or telepresence endpoints.

Benefits

- Reduced time and complexity in configuring and managing user experience through highly intuitive interface
- Improved user experience through easy touch control
- Collaboration through intuitive integration with Polycom® HDX® RealPresence® Group Series video endpoints or systems, Polycom® HDX endpoints, Polycom® RealPresence® Group Series endpoints, or Microsoft® Exchange® servers or hosted Exchange environments

Hax,2009-11-27 Strategy is the most central issue in management It has to do with defining the purpose of an organization understanding the market in which it operates and the capabilities the firm possesses and putting together a winning plan There are many influential frameworks to help managers undertake a systematic reflection on this issue The most dominant approaches are Michael Porter s Competitive Strategy and the Resource Based View of the Firm popularized by Gary Hamel and C K Prahalad Arnaldo Hax argues there are fundamental drawbacks in the underlying hypotheses of these approaches in that they define strategy as a way to achieve sustainable competitive advantage This line of thinking could be extremely dangerous because it puts the competitor at the center and therefore anchors you in the past establishes success as a way of beating your competitors and this obsession often leads toward imitation and congruency The result is commoditization which is the worst outcome that could possibly happen to a business The Delta Model is an extremely innovative view of strategy It abandons all of these assumptions and instead puts the customer at the center By doing that it allows us to be truly creative separating ourselves from the herd in pursuit of a unique and differentiated customer value proposition Many years of intense research at MIT supported by an extensive consulting practice have resulted in development of powerful new concepts and practical tools to guide organizational leaders into a completely different way of looking at strategy including a new way of doing customer segmentation and examining the competencies of the firm with an emphasis on using the extended enterprise as a primary way of serving the customer This last concept means that we cannot play the game alone that we need to establish a network among suppliers the firm the customers and complementors firms that are in the business of developing products and services that enhance our own offering to the customer Illustrated through dozens of examples and discussion of application to small and medium sized businesses and not for profits the Delta Model will help readers in all types of organizations break out of old patterns of behavior and achieve strategic flexibility an especially timely talent during times of crisis intense competition and rapid change Knowledge-Based Intelligent Information and

Engineering Systems Rajiv Khosla, 2005-08-25 Dear delegates friends and members of the growing KES professional community welcome to the proceedings of the 9th International Conference on Knowledge Based and Intelligent Information and Engineering Systems hosted by La Trobe University in Melbourne Australia. The KES conference series has been established for almost a decade and it continues each year to attract participants from all geographical areas of the world including Europe, the Americas, Australasia and the Pacific Rim. The KES conferences cover a wide range of intelligent systems topics. The broad focus of the conference series is the theory and applications of intelligent systems. From a pure research field, intelligent systems have advanced to the point where their abilities have been incorporated into many business and engineering application areas. KES 2005 provided a valuable mechanism for delegates to obtain an extensive view of the latest research into a range of intelligent systems, algorithms, tools and techniques. The conference also gave delegates the chance to come into contact with those applying intelligent systems in diverse commercial areas. The combination of theory and practice represented a unique opportunity to gain an appreciation of the full spectrum of leading edge intelligent systems activity. The papers for KES 2005 were either submitted to invited sessions chaired and organized by respected experts in their fields or to a general session managed by an extensive International Program Committee or to the Intelligent Information Hiding and Multimedia Signal Processing IIHMSP Workshop managed by an International Workshop Technical Committee.

VoIP Technology: Applications and Challenges Tamal Chakraborty, Iti Saha Misra, Ramjee Prasad, 2018-08-03 This book offers an accessible introduction and practical guide to Voice over Internet Protocol (VoIP) technology, providing readers with the know-how to solve the problems encountered in applying VoIP technology across all types of network. It incorporates the latest research findings and brings readers up to date with the challenges that are faced by researchers developing novel applications of VoIP. The authors discuss the general architecture of VoIP technology along with its application and relevance in conventional and emerging wireless communication networks including Wireless Local Area Networks (WLANs), Worldwide Interoperability for Microwave Access (WiMAX), Long Term Evolution (LTE) and Cognitive Radio Networks. The book also includes Quality of Service (QoS) studies under dynamic and unpredictable network conditions which examine the reliability of both legacy systems and the upcoming pervasive computing systems. Further, it explains how the heuristic-based learning algorithms that are used in VoIP communications may help develop today's technology in the area of autonomous systems. This book is a valuable source of information for academics and researchers as it provides state-of-the-art research in VoIP technology. It is also of interest to network designers, application architects and service providers looking for a coherent understanding of VoIP across a wide range of devices, network applications and user categories. **Digital Transformation**
