

Polynomial Equations

A **polynomial equation** is any equation that contains a polynomial expression.

The **degree of a polynomial equation** is the degree of the polynomial expression in the equations.

$2x^2 + 5x + 3 = 0$ is a second degree polynomial equation.

The **zero-product property** states that if the product of two numbers is zero, then one of those numbers must be zero. If your answer to a multiplication problem is zero, then one of the numbers you are multiplying (factors) must be zero.

A **quadratic equation** is an equation in the form $ax^2 + bx + c = 0$ where a, b and c are real numbers and $a \neq 0$. When it is written in descending order of exponent like this, it is said to be in **standard form**. Since the left-hand side is a 2nd degree polynomial, these are also sometimes known as second-degree equations.

Steps for solving a quadratic equation by factoring

1. Make sure the polynomial is in standard form and equals zero.
2. Factor the polynomial
3. Set each of the factors equal to zero
4. Solve those two little equations
5. Check your answers by substituting back into the original.

Remember: As soon as you see a square and an equal sign:

- Drag everything to the left and put the terms in order
- Expect 2 answers

Solving higher order equations by factoring

$$w^3 + 5w^2 - 4w - 20 = 0 \quad 3^{\text{rd}} \text{ degree} - \text{expect 3 answers}$$

$$w^2(w + 5) - 4(w + 5) = 0$$

$$(w + 5)(w^2 - 4) = 0$$

$$(w + 5)(w + 1)(w - 1) = 0$$

$$w + 5 = 0 \mid w + 1 = 0 \mid w - 1 = 0$$

$$w = -5 \mid w = -1 \mid w = 1$$

Lessons learned from maths lessons: Things we have learned from watching trainee teachers of secondary mathematics Joan Stephens, Keith Parramore, 2022-09-30 This is a book about teaching mathematics in schools There are many excellent books about teaching mathematics that are driven by pedagogy psychology or research This book is different It is driven by the mathematics that underpins the school mathematics curriculum informed by the authors experiences and opinions In the field of pedagogy there are very few fixed knowns Mathematics on the other hand is a well founded rock So the thoughts and advice provided by Keith Parramore and Joan Stephens are anchored to that rock Lessons Learned from Maths Lessons is based on observations in secondary schools and many sections are relevant to primary school mathematics The authors are a husband and wife team of practising mathematicians with a wealth of experience in supporting trainee teachers They have learned something new and or interesting from every mathematics lesson they have observed One objective of this book is to share some of that learning with the reader A second objective is to promote an approach to teaching mathematics that empowers pupils and promotes understanding Trainee teachers often identify specific topic areas that they perceive they need to develop Parramore and Stephens argue that the greater need is for them to develop depth rather than breadth to truly explore the mathematical foundations of what they are teaching
