1402 made a career of translating big informational texts from Latin into English prose. These included Ranulph Higden's *Polychronicon*, an enormous universal history; Bartholomaeus Anglicus's well-known natural encyclopedia *De proprietatibus rerum*; and Giles of Rome's advice for princes manual *De regimine principum*. These were shrewd choices, accessible and on trend. *De proprietatibus rerum* and *De regimine principum* had already been translated into French and copied in deluxe manuscripts for the French and English nobility, and the *Polychronicon* had been circulating in England for several decades. This book argues that John Trevisa's translations of compendious informational texts disclose an alternative literary history by way of information culture. Bold and lively experiments, these translations were a gamble that the future of literature in England was informational prose. This book argues that Trevisa's oeuvre reveals an alternative literary history, more culturally expansive and more generically diverse than that which we typically construct for his contemporaries: Geoffrey Chaucer and William Langland. Thirteenth and early fourteenth-century European writers compiled massive reference books which would shape knowledge well into the Renaissance. This study maintains that they had a major impact on English poetry and prose. In fact, what we now recognize to be literary properties emerged in part from translations of medieval compendia with their inventive ways of handling vast quantities of information. In revisiting and reframing conventional questions about inequality, it considers the processes through which inequalities have come to be regarded as issues of public concern, the various ways that inequalities have been historically defined, and how those ideas and imaginings of inequalities are produced, embodied, objectified, recognized, and contested in and through a variety of cultural practices and sites. Bringing together an international and interdisciplinary group of contributors, the book will be of interest to scholars from across the humanities and social sciences, including anthropology, sociology, and women's and gender studies. **The Chariton Review**, 1999 *Thistle Versus Rose* Susan Morrison, 2014-06-19 Ask a Scotsman for directions and he'll tell you which way to go.
