Karley,Scott N. Johnson,Rex Brennan,Peter J. often incomplete which makes identifying the right combination for crop protection difficult We aimed to address this Research Topic by inviting authors to contribute their knowledge of appropriate resistance and tolerance traits explore what is known about durability and breakdown of defensive traits and finally asking what are the prospects for exploiting these traits for crop protection The research topic summarised in this book addresses some of the most important issues in the future sustainability of global crop production **Organ Preservation for Transplantation** Armand M.
