Occasional Papers ,1993 **Children and the Politics of Culture** Sharon Stephens,2021-02-09 The bodies and minds of children and the very space of children are under assault This is the message we receive from daily news headlines about violence sexual abuse exploitation and neglect of children and from a proliferation of books in recent years representing the domain of contemporary childhood as threatened invaded polluted and stolen by adults Through a series of essays that explore the global dimensions of children at risk an international group of researchers and policymakers discuss the notion of children s rights and in particular the claim that every child has a right to a cultural identity Explorations of children s situations in Japan Korea Singapore South Africa England Norway the United States Brazil and Germany reveal how children s everyday lives and futures are often the stakes in contemporary battles that adults wage over definitions of cultural identity and state cultural policies Throughout this volume the authors address the complex and often ambiguous implications of the concept of rights For example it may be used to defend indigenous children from radically assimilationist or even genocidal state policies but it may also be used to legitimate racist institutions A substantive introduction by the editor examines global political economic frameworks for the cultural debates affecting children and traces intriguing sometimes surprising threads throughout the papers In addition to the editor the contributors are Norma Field Marilyn Ivy Mary John Hae joang Cho Saya Shiraishi Vivienne Wee Pamela Reynolds Kathleen Hall Ruth Mandel Manuela Carneiro da Cunha and Njabulo Ndebele **Teacher in Zimbabwe** ,2014 **Zimbabwe** Brian Raftopoulos,Tyrone Savage,2004 The author is from the Institute of Development Studies at the University of Zimbabwe He examines the paradox ensuing from the Lancaster House Settlement at Zimbabwe s independence that whilst colonial rule was ended the framework was provided for continued white privilege on the basis of control of the economy by this elite and through them transnational capital He analyses the responses of the ruling including official elite the black petty bourgeoisie and the group associated with the former Rhodesian Front **Moto** ,1998 **(Re)Constructing Memory: Textbooks, Identity, Nation, and State** James H. Williams,Wendy D. Bokhorst-Heng,2016-07-08 This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation Authors voices come from a variety of contexts some historical some contemporary some providing analyses over time But they all consider the changing portrayal of diversity belonging and exclusion in multiethnic and diverse societies where silenced invisible marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative The authors discuss portrayals of past exclusions around religion ethnicity sexual orientation as they look at the shifting boundaries of insider and outsider This book is thus about who we are not only demographically but also in terms of the past especially how and whether we teach discredited pasts through textbooks The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive

critical and positively bonding in increasingly larger and more inclusive contexts International Handbook of Mathematical Learning Difficulties Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

Legitimacy and the State in Twentieth-Century Africa Terence Ranger,Olufemi Vaughan,1993-06-15 This book takes as its theme the ways in which governments legitimate their rule both to themselves and to their subjects Its introduction explores legitimacy and pre colonial states but the three sections of the book deal with colonial legitimacy the question of legitimation in the transition from colonialism to majority rule and the contemporary debate about accountability **Annual Report of the Secretary for Education and Culture for the Year Ended ...** Zimbabwe.
