Foundations of Robotics Damith Herath, David St-Onge, 2022-09-25 This open access book introduces key concepts in robotics in an easy to understand language using an engaging project based approach It covers contemporary topics in robotics providing an accessible entry point to fundamentals in all the major domains A section is dedicated to introducing programming concepts using Python which has become a language of choice in robotics and AI The book also introduces the reader to the Robot Operating System ROS the ubiquitous software and algorithmic framework used by researchers and the industry The book provides an inspired up to date and multidisciplinary introduction to robotics in its many forms including emerging topics related to robotics on Machine Learning ethics Human Robot Interaction and Design Thinking The book also includes interviews with industry experts providing an additional layer of insight into the world of robotics The book is made open access through the

generous support from Kinova Robotics The book is suitable as an undergraduate textbook in a relevant engineering course It is also suitable for students in art and design high school students and self learners who would like to explore foundational concepts in robotics This book provides the foundation for understanding how robots work It is the accessible introduction that artists and engineers have been waiting for Ken Goldberg William S Floyd Jr Distinguished Chair in Engineering UC Berkeley

Robotics Oliver Brock,Jeffrey C. Trinkle,Jeff Trinkle,Fabio Ramos,2009 State of the art robotics research on such topics as manipulation motion planning micro robotics distributed systems autonomous navigation and mapping Robotics Science and Systems IV spans a wide spectrum of robotics bringing together researchers working on the foundations of robotics robotics applications and analysis of robotics systems This volume presents the proceedings of the fourth annual Robotics Science and Systems conference held in 2008 at the Swiss Federal Institute of Technology in Zurich The papers presented cover a range of topics including computer vision mapping terrain identification distributed systems localization manipulation collision avoidance multibody dynamics obstacle detection microrobotic systems pursuit evasion grasping and manipulation tracking spatial kinematics machine learning and sensor networks as well as such applications as autonomous driving and design of manipulators for use in functional MRI The conference and its proceedings reflect not only the tremendous growth of robotics as a discipline but also the desire in the robotics community for a flagship event at which the best of the research in the field can be presented

Social Robots from a Human Perspective Jane Vincent,Sakari Taipale,Bartolomeo Sapio,Giuseppe Lugano,Leopoldina Fortunati,2015-05-08 This book presents a comprehensive overview of the human dimension of social robots by discussing both transnational features and national peculiarities Addressing several issues that explore the human side of social robots this book investigates what a social robot is and how we might come to think about social robots in the different areas of everyday life Organized around three sections that deal with Perceptions and Attitudes to Social Robots Human Interaction with Social Robots and Social Robots in Everyday Life it explores the idea that even if the challenges of robot technologies can be overcome from a technological perspective the question remains as to what kind of machine we want to have and use in our daily lives Lessons learned from previous widely adopted technologies such as smartphones indicate that robot technologies could potentially be absorbed into the everyday lives of humans in such a way that it is the human that determines the human machine interaction In a similar way to how today's information and communication technologies were initially designed for professional industrial use but were soon commercialized for the mass market and then personalized by humans in the course of daily practice the use of social robots is now facing the same revolution of domestication In the context of this transformation which involves the profound embedding of robots in everyday life the human aspect of social robots will play a major part This book sheds new light on this highly topical issue one of the central subjects that will be taught and studied at universities worldwide and that will be discussed widely publicly and repeatedly in the near future
