Each theoretical concept is well supported by illustrative examples. Besides the book provides a large number of solved problems to reinforce the theoretical understanding of concepts. Pauli spent 30 years as a professor at the Federal Institute of Technology ETH in Zurich which occupies a central place in this biography. It would be incomplete, however, without a rendering of Pauli's sarcastic wit and most importantly of the world of his dreams. It is through the latter that quite a different aspect of Pauli's life comes in, namely his association with the psychology of C. G. Jung and his school.
