Guideline for Building Services Design Inspired by the Cradle to Cradle Concept Johannes Stiglmaier, Karsten Jurkait, 2020 The Cradle to Cradle C2C concept is a biomimetic approach that models human industry on nature s processes viewing materials as nutrients circulating in healthy and safe metabolisms It seeks to create systems that are not only efficient but also essentially waste free A growing number of building owners and developers are looking to implement it in their buildings be it to increase the productivity of their workforce or to provide a differentiator The C2C concept is reasonably covered in building construction however it is a rather uncharted area in building services making it difficult for MEP engineers to develop C2C inspired designs Arup set out to bridge this gap establishing how C2C inspired design would look like in the

different MEP disciplines and researching which systems products and materials are available in the market to meet the corresponding criteria The result is a comprehensive guideline that enables MEP engineers to develop a C2C inspired design It covers design criteria system selection system sizing design for deconstruction as well as material and product selection for the main MEP disciplines and sets out a number of criteria by which the aptness of a design for C2C can be measured

Enhanced Trustworthiness and End User Acceptance of Conditionally Automated Vehicles in the Transition Period Daniel Watzenig, Lisa-Marie Schicker, 2020-12-08 A key factor for the introduction of conditionally

automated vehicles is a high level of trust in and acceptance of these vehicles by the end user To bring such so called TrustVehicles on the road the end users and their expectations have to be strongly taken into consideration by for instance developing driver interfaces as well as reliable and robust automated driving controllers The main topics of the book are ranging from the question of how these TrustVehicles should behave and interact with users the development of reliable sense plan act approaches the whole verification procedures starting with simulation to studies on the driving simulator and the verification on a test track All these steps together provide an overall picture and pave the way to trustworthy and reliable automated vehicles so called TrustVehicles Planning and Design Guidelines for Airport Terminal Facilities United States. Federal Aviation Administration,1988 **Automated Parking Systems** Benjamin Ramirez, AI,2025-03-12 Automated Parking Systems explores the potential of robotic parking to revolutionize urban landscapes and address parking scarcity It examines automated parking systems APS as a technologically advanced solution offering optimized space utilization compared to traditional parking garages One intriguing fact is that APS can significantly reduce the space required for parking potentially freeing up valuable land for other urban development purposes The book also highlights how APS contribute to smart city initiatives by reducing traffic congestion and promoting sustainable practices The book argues that APS are both technologically feasible and economically viable presenting them as a forward thinking alternative for urban planners and architects It begins by introducing the fundamental principles of APS operation and design Later chapters delve into specific technologies integration of sensors and control systems and architectural considerations for various building types The book progresses to analyze real world case studies and economic feasibility offering a comprehensive view of APS This book uniquely blends engineering precision with architectural vision providing a holistic perspective on APS It moves beyond technical descriptions to address the aesthetic and functional integration of these systems into urban environments By providing a comprehensive and evidence based overview of APS the book offers practical insights for planning design and implementation making it a key resource for professionals interested in architecture technology and urban development
