2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do Mathematical Modelling and Applications Gloria Ann Stillman, Werner Blum, Gabriele

Kaiser, 2017-11-05 This volume documents on going research and theorising in the sub field of mathematics education devoted to the teaching and learning of mathematical modelling and applications Mathematical modelling provides a way of conceiving and resolving problems in the life world of people whether these range from the everyday individual numeracy level to sophisticated new problems for society at large Mathematical modelling and real world applications are considered as having potential for multi disciplinary work that involves knowledge from a variety of communities of practice such as those in different workplaces e.g. those of educators designers construction engineers museum curators and in different fields of academic endeavour e.g. history archaeology mathematics economics From an educational perspective researching the development of competency in real world modelling involves research situated in crossing the boundaries between being a student engaged in modelling or mathematical application to real word tasks in the classroom being a teacher of mathematical modelling in or outside the classroom or bridging both and being a modeller of the world outside the classroom This is the focus of many of the authors of the chapters in this book All authors of this volume are members of the International Community of Teachers of Mathematical Modelling ICTMA the peak research body into researching the teaching and learning of mathematical modelling at all levels of education from the early years to tertiary education as well as in the workplace Resources in Education, 1998 Parliamentary Debates (Hansard), Great Britain. House of Commons, 2012 **Urban Regeneration and Neoliberalism** Clare Kinsella, 2020-10-29 This book explores the concept of home in Liverpool over phases of regeneration following the Second World War Using qualitative research in the

oral history tradition it explores what the author conceptualises as forward facing regeneration in the period up to the 1980s and neoliberal regeneration interventions that prioritise the past from the 1980s to the present The author examines how the shift towards city centre focused redevelopment and event led initiatives has implications for the way residents make sense of their conceptualisations of home and demonstrates how the shift in regeneration focus discourse and practice away from Liverpool s neighbourhood districts and towards the city centre has produced changes in the ways that residents identify with neighbourhoods and the city centre with prominence being given to the latter Employing Pierre Bourdieu s concepts of habitus and field as mechanisms for understanding different senses of home and shifts from localised views to globalised views this book will appeal to those with interests in urban sociology regeneration geography sociology home cultures and cities
