Neo-Marxism and Post-Keynesian Economics Ludo Cuyvers, 2022-06-08 Piero Sraffa and Joan Robinson, both iconic Cambridge economists, were highly influenced by the economic theory of Karl Marx and integrated important elements of Marx's economic system into their theories. This book argues, based on published and unpublished documents, that the work of Sraffa and Robinson can in fact be considered as essentially post-Keynesian neo-Marxist. The first part of the book reviews the intellectual development of several key thinkers to this neo-Marxist current in economic thought: Kalecki, Steindl, Baran, and Sweezy. Part One and Part Two separately examine Robinson and Sraffa's works and questions how they fit into this specific neo-Marxist current, either building on it in Robinson's case or following another direction in Sraffa's case. Part Three observes Robinson's theory of economic growth and its relationship to the views of Marx and Kalecki. Overall, Cuyvers demonstrates how their thought processes share characteristics with neo-Marxist key ideological ideas such as stating or implying the labour theory of value as either redundant or wrong, emphasising the role of class struggle in the distribution of income, and rejecting Marx's falling rate of profits. Following on from ideas briefly introduced in Cuyvers's *Economic Ideas of Marx's Capital* 2017, this book will particularly appeal to readers interested in the history of economic thought, the work of Sraffa, Robinson, and Marx, post-Keynesian economics, and neo-Marxism.

Destruction Arthur M. Diamond, Jr., 2019-05-01 Life improves under the economic system often called entrepreneurial capitalism or creative destruction but more accurately called innovative dynamism *Openness to Creative Destruction* Sustaining Innovative Dynamism shows how innovation occurs through the efforts of inventors and innovative entrepreneurs how workers on balance benefit and how good policies can encourage innovation The inventors and innovative entrepreneurs are often cognitively diverse outsiders with the courage and perseverance to see and pursue serendipitous discoveries or slow hunches Arthur M Diamond Jr shows how economies grow where innovative dynamism through leapfrog competition flourishes as in the United States from roughly 1830 1930 Consumers vote with their feet for innovative new goods and for process innovations that reduce prices benefiting ordinary citizens more than the privileged elites Diamond highlights that because breakthrough inventions are costly and difficult patents can be fair rewards for invention and can provide funding to enable future inventions He argues that some fears about adverse effects on labor market are unjustified since more and better new jobs are created than are destroyed and that other fears can be mitigated by better policies The steady growth in

regulations often defended on the basis of the precautionary principle increases the costs to potential entrepreneurs and thus reduces innovation The Great Fact of economic history is that after at least 40 000 years of mostly poor nasty brutish and short humans in the last 250 years have started to live substantially longer and better lives Diamond increases understanding of why **Fair Share** Stephen Bell, Michael Keating, 2018-02-26 Winners and losers it's the brutal reality in most advanced economies Increased inequality economic stagnation and financial instability are the consequences of technological change globalisation and the massive increase in financial systems Governments struggle to deal with the unrest this creates and to resolve competing claims for the spoils of growth Australia's egalitarian traditions and past reforms have served the country well but the risks of weakening demand stagnating living standards and structural unemployment are growing and require urgent attention Does Australia have the fiscal and political capacity to achieve a reform agenda Can the Australian political system manage these vital changes Will voters support them Fair Share ignites the necessary debate to instigate action

Inequality and Stagnation Santiago Capraro, Carlo Panico, Luis Torres-González, 2024-08-02 The book examines how the outgrowth of the financial industry has contributed to the recent tendencies towards inequality and stagnation It proposes a monetary interpretation of these events using a Classical Keynesian theoretical approach derived from the work of Keynes and Sraffa The approach moves from the distributive conflicts among economic and social groups presuming that they influence the legislation shaping the organisation of the markets and the policy of the authorities It argues that the degrees of liquidity of assets which reflect the individual perceptions of their future prices ultimately depend on the organisation of the markets and policy decisions The development of his work persuaded Keynes that it was necessary to revolutionise the scientific foundations of economic discipline to effectively interpret events and recommend policies He consequently introduced in 1932 a monetary theory of production Following these lines Sraffa proposed in *Production of Commodities* to take the rate of interest as an independent variable in the theory of distribution Using the Classical Keynesian approach the book shows how the changes in legislation and policies since the abandonment of the Bretton Woods agreements have caused the outgrowth of finance and how these alterations have raised financial instability It identifies various competitive mechanisms through which financial events can affect income distribution and growth describing how they have triggered the recent tendencies towards inequality and stagnation This book is essential reading for researchers studying the interactions among financial markets distribution and growth **Boom and Bust** Royce Kurlmelovs, 2018-08-28 This is a cautionary tale About greed irresponsibility and failing to learn from the past Australia's mining boom is still talked about with a sense of awe This once in a lifetime event capped off 25 straight years of economic growth Thanks to mining we sidestepped the worst of the Global Financial Crisis To the rest of the world Australia was an economic miracle And then the boom ended Now Australia is grappling with what that means at a time of rising economic inequality and political upheaval The end of the boom isn't about money it's about people Boom and Bust looks at what happens to those who came into vast

wealth only to watch it dry up To those who thought they had a good job for life but didn't The bust didn't just happen on stock market screens it was lived and is still being lived right now in dusty towns and cities all around the country As he did in his bestselling book The Death of Holden Royce Kurmelovs reveals the reality behind the headlines Boom and Bust is a dirt under the nails look at the winners the losers and the impact of the boom that wasn't meant to end This is a book all Australians should read Brilliant and powerful Nick Xenophon on Royce Kurmelovs THE DEATH OF HOLDEN
