¹The concentration of the gas, the thickness of the membrane, the pressure difference ΔP and the time t depend on the material of the membrane and the gas. The concentration of the gas is 0.001 mol/L, the thickness of the membrane is 0.001 m, the pressure difference ΔP is 100 kPa and the time t is 1 s.

These suggested guidelines that we found very hard to implement, being for the most part missing and for some interesting parts that they offer the an additional research it would be useful for the development of these

Disorders of the Neonatal Airway Janet Lioy, Steven E. Sobol, 2015-01-07 Disorders of the Neonatal Airway serves as a comprehensive multidisciplinary resource for all practitioners who care for neonates with airway disorders With the evolution of advances in neonatology and neonatal airway care over the past three decades the survival rate and life expectancy of premature newborns have dramatically increased to well over 50% in 24-25 week gestation infants Unfortunately survival with long term intubation has brought a corresponding increase in acquired airway disorders needing collaborative high level neonatal and otolaryngological care Additionally with the advent of fetal therapy congenital airway disorders now make up a substantial number of neonates with complex airway disorders Because of this fact there has been increased focus on the multidisciplinary evaluation and management of neonatal airway disorders The book is organized into three sections the first focuses on Malformations and Deformations the second focuses on Assessment Evaluation and Treatment and the third

discusses Education Simulation and Quality As one of the only comprehensive resources on the topic Disorders of the Neonatal Airway focuses on a multidisciplinary approach to the neonatal airway This unique approach makes this reference a must read for practitioners from many disciplines The book is organized into three sections the first focuses on Malformations and Deformations the second focuses on Assessment Evaluation and Treatment and the third discusses Education Simulation and Quality As one of the only comprehensive resources on the topic Disorders of the Neonatal Airway focuses on a multidisciplinary approach to the neonatal airway This unique approach makes this reference a must read for practitioners from many disciplines The book is organized into three sections the first focuses on Malformations and Deformations the second focuses on Assessment Evaluation and Treatment and the third discusses Education Simulation and Quality As one of the only comprehensive resources on the topic Disorders of the Neonatal Airway focuses on a multidisciplinary approach to the neonatal airway This unique approach makes this reference a must read for practitioners from many disciplines

Comprehensive Healthcare Simulation: Emergency Medicine Christopher Strother, Yasuharu Okuda, Nelson Wong, Steven McLaughlin, 2021-02-11 This is a practical guide to the use of simulation in emergency medicine training and evaluation It covers scenario building debriefing and feedback and it discusses the use of simulation for different purposes including education crisis resource management and interdisciplinary team training Divided into five sections the book begins with the historical foundations of emergency medicine as well as education and learning theory In order to effectively relay different simulation modalities and technologies subsequent chapters feature an extensive number of practical scenarios to allow readers to build a curriculum These simulations include pediatric emergency medicine trauma disaster medicine and ultrasound Chapters are also organized to meet the needs of readers who are in different stages of their education ranging from undergraduate students to medical directors The book then concludes with a discussion on the future and projected developments of simulation training Comprehensive Healthcare Simulation Emergency Medicine is an invaluable resource for a variety of learners from medical students residents and practicing emergency physicians to emergency medical technicians and health related professionals
