National Youth Development Agency Annual Report South Africa. National Youth Development Agency, 2016

Low-Income Students, Human Development and Higher Education in South Africa Melanie Walker, Monica

McLean, 2022-07-15 This book explores learning outcomes for low income rural and township youth at five South African universities. The book is framed as a contribution to southern and Africa centred scholarship adapting Amartya Sen's capability approach and a framework of key concepts: capabilities, functionings, context, conversion factors, poverty, and agency to investigate opportunities and obstacles to achieved student outcomes. This approach allows a reimagining of inclusive learning outcomes to encompass the multi-dimensional value of a university education and a plurality of valued cognitive and non-cognitive outcomes for students from low income backgrounds whose experiences are strongly shaped by hardship. Based on capability theorising and student voices, the book proposes for policy and practice a set of contextual higher education capability domains and corresponding functionings orientated to more justice and more equality for each person to have the opportunities to be and to do what they have reason to value. The book concludes that sufficient material resources are necessary to get into university and flourish while there; the benefits of a university education should be rich and multi-dimensional so that they can result in functionings in all areas of life as well as work and future study; the inequalities and exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for inclusive learning outcomes to be meaningful; and that universities ought to be doing more to enable black working class students to participate and succeed. *Low Income Students Human Development and Higher Education in South Africa* makes an original contribution to capability scholarship conceptually in theorising a South based multi-dimensional student well-being higher education matrix and a rich reconceptualisation of learning outcomes as well as empirically by conducting rigorous longitudinal in depth mixed methods research on students' lives and experiences in higher education in South Africa. The audience for the book includes higher education researchers, international capability scholars, practitioners, and policy makers.

Accessing Post-School Studies Venicia McGhie & Madge du Preez, 2017-12-01 *Accessing Post School Studies* A student's GPS to successful learning makes a valuable contribution to often problematic and pertinent South African higher education issues such as student access and success, student learning, student support, and student engagement. In this regard, the authors draw on the works of higher education theorists such as Kuh, Tinto, Marton, and Sijm. The book is primarily a helpful resource for South African learners in school, students at universities, life orientation teachers, as well as parents of prospective university students. It will especially assist students to adapt to the university environment. Prof Victor N Teise Sol Plaatje University Kimberley South Africa

Hosseini, **No Last Place to Rest** Dineo Skosana, 2025-02 Examines the impact of coal mining on the lives of rural communities in post apartheid South Africa No Last Place to Rest Coal Mining and Dispossession in South Africa is an exploration of the ongoing struggles faced by families in the Mpumalanga and KwaZulu Natal provinces of South Africa whose lives have been upended by the relentless expansion of coal mining operations These regions burdened with the task of fulfilling the nation's energy needs and boosting the country's economy witness daily the harsh realities of dispossession that extend far beyond the mere loss of property Dineo Skosana presents a compelling argument that dispossession remains a present day reality and crisis contradicting the notion that it is merely a relic of the past in the post apartheid landscape It challenges the narrow perspective that equates land loss in material and economic terms only Skosana considers the impact of grave relocations a common occurrence in these mining dominated locales and the profound spiritual anguish and dehumanisation communities endure as their lands are excavated In African societies connections to the land extend beyond

the material land has a sacred and ancestral value Grave relocations disrupt this connection families have with their ancestors In dispossessing not only the living but also the dead from their lands the author argues that the act wounds the collective soul of a people eroding their cultural heritage and collective identity and belonging This book offers a rich ethnographic account of the experiences struggles and resistance of the affected communities as well as a critical analysis of the legal and policy frameworks that enable their exploitation In relation to the land question in South Africa No Last Place to Rest presents deep insights for communities activists and government sectors acting in support of social justice and redress
