The book includes theoretical chapters on student organising, student activism, and representation; chapters on historical and current developments in student politics in Anglophone and Francophone Africa; and in-depth case studies on student representation and activism in a cross-section of universities and countries. The book provides a unique resource for academics, university leaders, and student affairs professionals, as well as student leaders and policy makers in Africa and elsewhere.

Cost-sharing and Accessibility in Higher Education: A Fairer Deal? Pedro N. Teixeira, D. Bruce Johnstone, Maria J. Rosa, Hans Vossensteyn, 2007-11-23
Higher education finances lie at the crossroads in many Western countries. Hence worldwide the most common approach to the need for increasing revenue was to use some form or forms of cost sharing or the shift of some of the higher educational per student costs from governments and taxpayers to parents and students. This raises several important challenges to higher education systems. First, there is the political and social controversy associated with most forms of cost sharing, particularly with tuition fees. Secondly, there are important issues in terms of the broad context of social policy, such as the role of families and students and the relationship that the state establishes with each of them. Third, there is the comparison of alternative instruments of cost sharing and the direct and indirect effects of each of them, notably in terms of educational equality. Overall, underlying cost sharing debates are fundamental questions about social choice, individual opportunities, and the role of government in society.
