November 2014 Foundation Tier Mathematics A:

Teaching Computing Henry M. Walker, 2018-04-24 Teaching can be intimidating for beginning faculty. Some graduate schools and some computing faculty provide guidance and mentoring but many do not. Often a new faculty member is assigned to teach a course with little guidance input or feedback. Teaching Computing: A Practitioner's Perspective addresses such challenges by providing a solid resource for both new and experienced computing faculty. The book serves as a practical, easy-to-use resource covering a wide range of topics in a collection of focused, down-to-earth chapters. Based on the author's extensive teaching experience and his teaching-oriented columns that span 20 years and informed by computing education research, the book provides numerous elements that are designed to connect with teaching practitioners, including a wide range of teaching topics and basic elements of teaching, including tips and techniques. Practical tone: the book serves as a down-to-earth practitioners' guide. Short, focused chapters. Coherent and convenient organization. Mix of general educational perspectives and computing-specific elements. Connections between teaching in general and teaching computing. Both historical and contemporary perspectives. This book presents practical approaches, tips, and techniques that provide a strong starting place for new computing faculty and perspectives for reflection by seasoned faculty wishing to freshen their own teaching.

Educating Special Students Michael Farrell, 2016-07-21 Educating Special Students is the definitive guide to evidence-based practice and professionally informed approaches to provision for special students. A new appendix provides information on basic anatomy and physiology. In scope: the book explores issues relating to intellectual disability, profound/moderate to severe and mild sensory impairments, orthopaedic impairment, and motor disorders, health impairments, and traumatic brain injury, oppositional defiant disorder, conduct disorder, anxiety disorders, depressive disorders, and attention deficit/hyperactivity disorder, communication disorders, speech, grammar, and comprehension, semantics and pragmatics, and autism spectrum disorder, specific learning disorders with impairment in reading, written expression, and mathematics, and developmental coordination disorder. Educating Special Students will be of interest to all those studying special education, professionals, and others committed to seeking the best provision for special students.
