Decolonising Geography? Disciplinary Histories and the End of the British Empire in Africa, 1948-1998 Ruth Craggs, Hannah Neate, 2023-10-02
DECOLONISING GEOGRAPHY This book presents an extraordinarily sensitive account of geography's histories in five African countries subjected to British colonial rule. Craggs and Neate draw together political and imaginative processes of decolonisation through an innovative biographical approach that humanizes and enlivens the story of our academic discipline. It will be an invaluable resource for those seeking a deeper understanding of decolonisation, its recent trajectories and far-reaching implications on the African continent. Shari Daya Affiliate Associate Professor in Environmental and Geographical Science, University of Cape Town. By placing the experiences, ideas and practices of African geographers in the center of their analyses, Craggs and Neate provide an unprecedented account of historical and contemporary decolonizing struggles within Geography and the academy. This book should be required reading for all those looking to decolonize the discipline and dislodge it from its Global North histories, institutions and ideologies. Mona Domosh, Professor of Geography, The Joan P and Edward J Foley Jr 1933 Professor, Dartmouth College. This meticulous work explores how colonialism, decolonization and postcolonialism shaped African geography and geographers. It sheds light on efforts to Africanize the discipline, a process which I was both witness to and a participant in. Stanley Okafor, Professor of Geography, Retired, University of Ibadan. How did a generation of academic geographers engage with constitutional decolonisation during the end of the British empire in Africa? In *Decolonising Geography: Disciplinary Histories and the End of the British Empire in Africa, 1948-1998*, Ruth Craggs and Hannah Neate explore how the teaching, research, administration and activism of geographers in Africa shaped the discipline and the post-colonial geopolitics of the continent. The authors follow the professional lives of individual geographers to provide fresh insights into decolonisation in the former British Empire in Africa, drawing from extensive archival research and more than 40 oral history interviews with geographers in Ghana, Nigeria, South Africa, Tanzania and the UK. *Decolonising Geography* is a must-read for any reader in the UK and Africa with an interest in the relationships between geography and decolonisation.

Presents innovative new research and analysis of the socio-spatial biographies of the Newcastle Brown Ale, Burberry and Apple brands. Forges strong new connections between political and cultural economy approaches within geography. Provides a distinctive and incisive

conceptual and theoretical framework capable of engaging other branded commodities and their branding in other times and places

Red, White, and Black Robert L. Woodson, Sr., 2021-05-11 In the rush to redefine the place of black Americans in contemporary society many radical activists and academics have mounted a campaign to destroy traditional American history and replace it with a politicized version that few would recognize According to the new radical orthodoxy the United States was founded as a racist nation and everything that has happened throughout our history must be viewed through the lens of the systemic oppression of black people Rejecting this false narrative a collection of the most prominent and respected black scholars and thinkers has come together to correct the record and tell the true story of black Americans in all its complexity diversity of experience and poignancy Collectively they paint a vivid picture of black people living the grand American experience however bumpy the road may be along the way But rather than a people apart blacks are woven into the united whole that makes this nation unique in history Featuring Essays by John Sibley Butler Jason D Hill Coleman Cruz Hughes John McWhorter Clarence Page Wilfred Reilly Shelby Steele Carol M Swain Dean Nelson Charles Love Rev Corey Brook Stephen L Harris Harold A Black Stephanie Deutsch Yaya J Fanusie Ian Rowe John Wood Jr Joshua Mitchell Robert Cherry Rev DeForest Black Soaries Jr

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth

Springer,2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics

Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke

Lloyd,2019-04-30 People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal Australia the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this Content INTRODUCTION by Arma an Teke Lloyd PART A Ideology and Governance of Migration CHAPTER 1 Coming to Terms with Liberal Democracy by the Populist Radical Right Parties of Western Europe Evidence from European Parliament Speeches over Minorities and Migration by Caner Tekin
