November 2014 Geography Theory:

The Life Cycle of Clusters Dirk Fornahl, Robert Hassink, 2017-04-28 One size fits all cluster policies have been rightly criticized in the literature. One promising approach is to focus cluster policies on the specific needs of firms depending on the stage of development: emergence, growth, sustainment, or decline. Their cluster is in. In this highly insightful book, these stage-specific cluster policies are analysed and evaluated. Moreover, several chapters also focus on smart specialization policies to promote regional development by taking into account the emergence and adaptation of clusters and industries. **European**

Cinema and Television Ib Bondebjerg, Eva Novrup Redvall, Andrew Higson, 2016-04-19 This book offers comparative studies of the production, content, distribution, and reception of film and television drama in Europe. The collection brings together scholars from the humanities and social sciences to focus on how new developments are shaped by national and European policies and practices and on the role of film and television in our everyday lives. The chapters explore key trends in transnational European film and television fiction, addressing issues of co-production and collaboration and of how cultural products circulate across national borders. The chapters investigate how watching film and television from neighbouring countries can be regarded as a special kind of cultural encounter with the possibility of facilitating reflections on national differences within Europe and negotiations of what characterizes a national or a European identity respectively.

Understanding Cultural Geography Jon Anderson, 2015-03-24 *Understanding Cultural Geography: Places and Traces* offers a comprehensive introduction to perhaps the most exciting and challenging area of human geography. By focusing on the notion of place as a key means through which culture and identity is grounded, the book showcases the broad range of theories, methods, and practices used within the discipline. This book not only introduces the reader to the rich and complex history of cultural geography but also the key terms on which the discipline is built. From these insights, the book approaches place as an ongoing composition of traces, highlighting the dynamic and ever-changing nature of the world around us. The second edition has been fully revised and updated to incorporate recent literature and up-to-date case studies. It also adopts a new seven-section structure and benefits from the addition of two new chapters: *Place and Mobility* and *Place and Language*. Through its broad coverage of issues such as age, race, scale, nature, capitalism, and the body, the book provides valuable perspectives into the cultural relationships between people and place. Anderson gives critical insights into these important issues, helping us to understand and engage with the various places that make up our lives. *Understanding Cultural Geography* is an ideal text for students being introduced to the discipline through either undergraduate or postgraduate degree courses. The book outlines how the theoretical ideas, empirical foci, and methodological techniques of cultural geography illuminate and make sense of the places we inhabit and contribute to. This is a timely update on a highly successful text that incorporates a vast foundation of knowledge: an invaluable book for lecturers and students. *Sentient Subjects* Gerda Roelvink, Magdalena Zolkos, 2020-12-27 Non-cognitive expressions of the life of the subject: feeling, motion, tactility.

instinct automatism and sentience have transformed how scholars understand subjectivity agency and identity This collection investigates the critical purchase of the idiom of affect in this post humanist thinking of the subject It also explores political and ethical questions raised by the deployment of affect as a theoretical and artistic category Together the contributors to this collection map the theoretically heterogeneous field of post humanist scholarship on affect making inspiring and at times surprising connections between Spinoza s and Tomkins s theories of affect the concept of affect and psychoanalysis and affect and animal studies in art and literature As a result the concepts vocabulary compatibility and attribution of affect are challenged and extended The chapters in this book were originally published as a special issue of *Angelaki* *Disability, Avoidance and the Academy* David Bolt, Claire Penketh, 2017-07-14 Disability is a widespread phenomenon indeed a potentially universal one as life expectancies rise Within the academic world it has relevance for all disciplines yet is often dismissed as a niche market or someone else s domain This collection explores how academic avoidance of disability studies and disability theory is indicative of social prejudice and highlights conversely how the academy can and does engage with disability studies This innovative book brings together work in the humanities and the social sciences and draws on the riches of cultural diversity to challenge institutional and disciplinary avoidance Divided into three parts the first looks at how educational institutions and systems implicitly uphold double standards which can result in negative experiences for staff and students who are disabled The second part explores how disability studies informs and improves a number of academic disciplines from social work to performance arts The final part shows how more diverse cultural engagement offers a way forward for the academy demonstrating ways in which we can make more explicit the interdisciplinary significance of disability studies and by extension disability theory activism experience and culture *Disability Avoidance and the Academy* Challenging Resistance will interest students and scholars of disability studies education studies and cultural studies
