Japanese Women in Science and Engineering Naonori Kodate, Kashiko Kodate, 2015-07-30 The gender gap in science technology engineering and mathematics STEM varies greatly from country to country and the number of Japanese women in these fields remains relatively few This prompts us to ask why the proportion of female scientists in Japan is still remarkably low and what measures the government universities and research institutes are taking to address this issue This book sheds light on historical developments and the current gender equality situation in Japan through the lens of women in STEM It shows how a policy of gender equality in science and engineering has been introduced through the coordinated efforts of academia scientific societies and the government and how this has led to a slow but steady increase in female representation The book draws on extensive data including interviews with government officials scientists and educators in Japan to provide a revealing case study on how the underrepresentation of women in the fields of science technology and engineering has been approached and dealt with by a national government It heralds a new era for female scientists by showcasing several programmes undertaken by government universities and national research institutions to support multiple career paths for and the progression of female scientists in Japan Tracing the historical development of Japan's policies towards women in science and education this book will be welcomed by students and scholars interested in Japanese studies comparative social policy gender studies employment and the history of science and technology Advanced Computer and Communication Engineering Technology

Hamzah Asyrani Sulaiman, Mohd Azlishah Othman, Mohd Fairuz Iskandar Othman, Yahaya Abd Rahim, Naim Che Pee, 2015-12-28 This book covers diverse aspects of advanced computer and communication engineering focusing specifically on industrial and manufacturing theory and applications of electronics communications computing and information technology Experts in research industry and academia present the latest developments in technology describe applications involving cutting edge communication and computer systems and explore likely future trends In addition a wealth of new algorithms that assist in solving computer and communication engineering problems are presented The book is based on presentations given at ICOCOE 2015 the 2nd International Conference on Communication and Computer Engineering It will appeal to a wide range of professionals in the field including telecommunication engineers computer engineers and scientists researchers academics and students **The Greater Maghreb** David Garcia

Cantalapiedra, 2019-09-18 This book represents a different approach in the study of the Sahel region in North Africa Due to the hybrid security threats sweeping across the area the whole region becomes a new security complex different from Middle East and more related to Western and Central Africa developments including the impact of drug trafficking coming from Latin America This book discusses how the Transnational Organized Crime Terrorism Nexus has created a very different dynamics from Middle East's hitting hard to people societies and states there The contributors argue that the countries in the area and the European Union should recognize this new complex and respond properly and differently to this situation

Telling Stories Differently Janet Condry, 2015-09-01 The aim of this book is to share a relatively loose collection of studies using digital storytelling as a pedagogical tool in Cape Peninsula University of Technology CPUT The book takes an informed social justice approach to teaching and learning at the heart of which is the exploration of DST as a practice of voice and agency Voice and agency are important in excavating and recovering subjugated identities and moving the concerns of those occupying subaltern spaces to the mainstream of teaching and learning Yet this discursive shift is not without inherent challenges Multi modal technologies are reflective of wider inequities in the so called technological divide Whilst this is a book about higher education there are important lessons for schooling On the one hand the book is a powerful demonstration of the potential of DST for enhancing learning in schools particularly in schools serving the poor and marginalised On the other hand improving teaching and learning in higher education through the creative use of technology is essential to overcome the learning challenges of those entering tertiary level institutions **Europe as the Western**

Peninsula of Greater Eurasia Glenn Diesen, 2021-09-27 Will the increased economic connectivity across the Eurasian supercontinent transform Europe into the western peninsula of Greater Eurasia The unipolar era entailed the US organising the two other major economic regions of the world Europe and Asia under US leadership The rise of the rest primarily Asia with China at the centre has ended the unipolar era and even 500 years of Western dominance China and Russia are leading efforts to integrate Europe and Asia into one large region The Greater Eurasian region is constructed with three categories of economic connectivity strategic industries built on new and disruptive technologies physical connectivity with bimodal transportation corridors and financial connectivity with new development banks trading currencies and payments systems China strives for geoeconomic leadership by replacing the US leadership position while Russia endeavours to reposition itself from the dual periphery of Europe and Asia to the centre of a grand Eurasian geoeconomic constellation Europe positioned between the trans Atlantic region and Greater Eurasia has to adapt to the new international distribution of power to preserve its strategic autonomy Chinese Foreign Policy Under Xi Tiang Boon Hoo, 2017-02-17 There has been a discernable

calibration of Chinese foreign policy since the ascension of Xi Jinping to the top leadership positions in China The operative term here is adjustment rather than renovation because there has not been a fundamental transformation of Chinese foreign policy or setting up of a new kitchen in foreign affairs Several continuities in Chinese diplomacy are still evident The People's Republic of China PRC has not wavered from its overarching strategy of rising through peaceful development The PRC is still an active participant and leader in or shaper of global and regional regimes even as it continues to push for reforms of the extant order towards an arrangement which it thinks will be less unjust and more equitable It seeks to better link up with the international track perhaps even more so under Xi's stewardship Yet amidst these continuities it is clear that there have been some profound shifts in China's foreign policy From the enunciation of strategic slogans such as the Asian security concept and major country diplomacy with Chinese characteristics the creation of the China led and initiated Asian Infrastructure

Investment Bank the pursuit of Xi's signature foreign policy initiative the One Belt One Road to a purportedly more assertive and resolute defense of China's maritime territorial interests in East Asia examples of these foreign policy calibrations both patent and subtle abound In short this has not been a complete metamorphosis but there are real changes with important repercussions for China and the international system The burning questions then are What Where How and Why What are these key foreign policy adjustments Where and how have these occurred in Chinese diplomacy And what are the reasons or drivers that inform these changes This book seeks to capture these changes Featuring contributions from academics think tank intellectuals and policy practitioners all engaged in the compelling business of China watching the book aims to shed more light on the calibrations that have animated China's diplomacy under Xi a leader who by most accounts is considered the most powerful Chinese *numero uno* since Deng Xiaoping

Knowledge Production and Contradictory Functions in African Higher Education Nico Cloete, Peter Maassen, 2015-03-01 The dominant global discourse in higher education now focuses on world class universities inevitably located predominantly in North America Europe and increasingly East Asia The rest of the world including Africa is left to play catch up But that discourse should focus rather on the tensions even contradictions between excellence and engagement with which all universities must grapple Here the African experience has much to offer the high participation and generously resourced systems of the so called developed world This book offers a critical review of that experience and so makes a major contribution to our understanding of higher education

Exploring Education at Postgraduate Level Anne O'Grady, Vanessa Cottle, 2015-09-25 There is a growing demand for educational professionals to develop a more critical understanding of the key and emerging debates in education so that they can better meet the challenges and demands placed upon them Exploring Education at Postgraduate Level represents a range of perspectives from educational experts to academic researchers and highlights the key issues surrounding contemporary education Organised into three parts and drawing on key issues in education theory policy and practice the book considers areas such as SEN evaluating learning ESOL and gender Featuring reflective questions case studies and summaries of core ideas the chapters include Troublesome learning journey Applying educational thinkers to contemporary educational practice Values production through social and emotional learning Policy research In defence ad hocery We are all critically reflective now The politics of critical reflection in higher education and in the work place Developing critical thought about SEN The refuge of relativism Aimed at supporting students on Masters level courses this accessible but critically provocative text is an essential resource for those wishing to develop a more critical understanding of the role purpose and function of educational systems and practices

Innovation Promotion Policies and Institutional Reform in China Kai Kajitani, 2024-08-05 This book focuses on the political economy behind innovation in China's new industrial sectors particularly the effects of policies and government regulation in the absence of the rule of law In its analysis the book aims to elucidate the mechanisms that generate innovation from multiple perspectives while utilizing insights from political science and law The

analysis in this book focuses on the following three points First by examining Guizhou Province s Big data industry promotion policy import substitution digitization policy and government intellectual property strategy we seek to empirically clarify the extent to which Chinese government industrial policy has stimulated innovation Next we examine in detail the issues surrounding the rule of law in China regarding introducing anti monopoly laws for digital platform companies and developing the intellectual property court system Third it focuses on the role played by local governments in industrial policy including the impact of industrial guidance funds on the efficiency of the regional financial sector and the impact of local bond issuance on the effectiveness of resource allocation among regions

Governance Models for Latin American Universities in the 21st Century Mohammad Ayub Khan, Antonio J. Dieck-Assad, Rosalia G. Castillo-Villar, Trina K Henderson-Torres, 2021-09-30 This book explores new models and future possibilities of university governance in a Latin American context using management and leadership theories The dramatic changes and uncertainty facing the world recently have forced us to reimagine the future of education Changes such as digitalization the increasing number of corporate universities and the need for cost effective educational programs and services require universities to keep evolving while ensuring that they maintain their essence as a critical social asset This book offers a new approach to managing and leading the university particularly by embracing the role and responsibility of delivering quality educational programs and services by being innovative and flexible enough to make urgent decisions and act upon them in a timely and appropriate manner With its contributions to management and the social sciences this interdisciplinary book will serve as a valuable resource to researchers administrators and students alike
