November 2014 Predicted Paper :

Predicting the Presidency George C. Edwards, III, 2016-03-22 Millions of Americans including many experienced politicians viewed Barack Obama through a prism of high expectations based on a belief in the power of presidential persuasion Yet many who were inspired by candidate Obama were disappointed in what he was able to accomplish once in the White House They could not understand why he often was unable to leverage his position and political skills to move the public and Congress to support his initiatives Predicting the Presidency explains why Obama had such difficulty bringing about the change he promised and challenges the conventional wisdom about presidential leadership In this incisive book George Edwards shows how we can ask a few fundamental questions about the context of a presidency the president's strategic position or opportunity structure and use the answers to predict a president's success in winning support for his initiatives If presidential success is largely determined by a president's strategic position what role does persuasion play Almost every president finds that a significant segment of the public and his fellow partisans in Congress are predisposed to follow his lead Others may support the White House out of self interest Edwards explores the possibilities of the president exploiting such support providing a more realistic view of the potential of presidential persuasion Written by a leading presidential scholar Predicting the Presidency sheds new light on the limitations and opportunities of presidential leadership

Politics and Big Data Andrea Ceron, Luigi Curini, Stefano Maria Iacus, 2016-12-19 The importance of social media as a way to monitor an electoral campaign is well established Day by day hour by hour evaluation of the evolution of online ideas and opinion allows observers and scholars to monitor trends and momentum in public opinion well before traditional polls However there are difficulties in recording and analyzing often brief unverified comments while the unequal age gender social and racial representation among social media users can produce inaccurate forecasts of final polls Reviewing the different techniques employed using social media to nowcast and forecast elections this book assesses its achievements and limitations while presenting a new technique of sentiment analysis to improve upon them The authors carry out a meta analysis of the existing literature to show the conditions under which social media based electoral forecasts prove most accurate while new case studies from France the United States and Italy demonstrate how much more accurate sentiment analysis can prove

The Will to Predict Eglė Rindzevičiūtė, 2023-05-15 In The Will to Predict Eglė Rindzevičiūtė demonstrates how the logic of scientific expertise cannot be properly understood without knowing the conceptual and institutional history of scientific prediction She notes that predictions of future population economic growth environmental change and scientific and technological innovation have shaped much of twentieth and twenty first century politics and social life as well as government policies Today such predictions are more necessary than ever as the world undergoes dramatic environmental political and technological change But she asks what does it mean to predict scientifically What are the limits of scientific prediction and what are its effects on governance institutions and society Her intellectual and political history of

scientific prediction takes as its example twentieth century USSR By outlining the role of prediction in a range of governmental contexts from economic and social planning to military strategy she shows that the history of scientific prediction is a transnational one part of the history of modern science and technology as well as governance Going beyond the Soviet case Rindzevicius argues that scientific predictions are central for organizing uncertainty through the orchestration of knowledge and action Bridging the fields of political sociology organization studies and history *The Will to Predict* considers what makes knowledge scientific and how such knowledge has impacted late modern governance *Networked Systems* Parosh Aziz Abdulla, Carole Delporte-Gallet, 2016-09-14 This book constitutes the refereed post proceedings of the 4th International Conference on Networked Systems NETYS 2016 held in Marrakech Morocco in May 2016 The 22 full papers and 11 short papers presented together with 19 poster abstracts were carefully reviewed and selected from 121 submissions They report on best practices and novel algorithms results and techniques on networked systems and cover topics such as multi core architectures concurrent and distributed algorithms parallel concurrent distributed programming distributed databases cloud systems networks security and formal verification *The FIRE Economy* Jane Kelsey, 2015-07-13 The FIRE economy built on finance insurance and real estate is now the world's principal source of wealth creation Its rise has transformed our political economic and social landscapes supported by a neoliberal regime that celebrates markets profit and risk From rising inequality and ballooning household debt to a global financial crisis and fiscal austerity the neoliberal orthodoxy has brought instability and empowered the few Yet it remains remarkably resilient even resurgent in New Zealand and abroad In 1995 Jane Kelsey set out a groundbreaking account of the neoliberal revolution in *The New Zealand Experiment* Now she marshals an exceptional range of evidence to show how this transfer of wealth and power has been systematically embedded over three decades Today organisations and commentators once at the vanguard of neoliberal reform including the IMF and Financial Times journalist Martin Wolf are warning the current model is unsustainable A post neoliberal era beckons In *The FIRE Economy* Kelsey identifies the risks posed by FIRE and the barriers embedded neoliberalism presents to a progressive post neoliberal transformation and urges us to act This is a book New Zealand cannot afford to ignore **Optimize Your Greatest Asset -- Your People** Gene Pease, 2015-08-17 Drive better business strategy with practical analytics for people data *Optimize Your Greatest Asset Your People* brings advanced analytics into Human Resources giving you a framework for optimizing human capital investments through predictive analysis You'll learn how to transition from anecdotes and surveys to more advanced measurement techniques and combine the data from multiple systems into a unified plan of action that improves business results Practical examples and case studies show how these techniques are applied in real world settings and executives and thought leaders weigh in on how advanced analytics are informing better business decisions every day Coverage includes the latest research on the state of current HR measurement techniques as well as the important considerations surrounding data security and employee trust Executives and managers

alike are swimming in pools of people data spread across multiple systems that don't talk to each other This book shows you how to bring that data together organize it and turn it into useful information and how to build your data strategy to take advantage of the wealth of available tools Produce actionable intelligence with data from multiple systems Move beyond activity metrics and into advanced measurements Create stronger policy covering security privacy and ethics Achieve sophisticated HR analytics without breaking employee trust It's time for HR leaders to get over their fear of Big Data Good data drives good business and human capital is the biggest asset a company has Start measuring the things that matter and start turning those measurements into actual information that goes beyond the spreadsheet Optimize Your Greatest Asset Your People shows you how to get started and where to go from there
