November 7th 2014 Foundation Non Calculator Test:

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people **Emerging Infectious Diseases**, 2016-07

The Climate Majority Leo Barasi, 2017-10-10 The Climate Majority is the first book to investigate climate apathy to describe how it prevents action to stop climate change and to show how it can be beaten with an approach developed for political campaigns Leo Barasi argues that dangerous climate change will only be prevented if the majority of people including those who aren't environmentalists are persuaded of the need to limit emissions He applies his policy and campaign experience to show that politicizing climate change makes it more difficult to build consensus particularly among people who are currently apathetic This is one of few books to focus on public opinion and climate change and it attempts to reveal what people really think by drawing examples and evidence of from the United States the UK Australia and Canada In a time of growing nationalism in many developed countries and right wing negativity towards the need for meaningful action The Climate Majority offers a new way of understanding what can be done within the system rather than despite it In an era of political setbacks for sustainability we need new hope and new tools Anyone who cares about climate change can draw on the lessons in this book to help build a climate majority Leo Barasi is a freelance consultant on climate change policy and campaigns He works with charities political candidates and private companies to help them understand and change public opinion He writes regularly for the New Statesman openDemocracy and Climate Home
