Banking on Growth Models Stephen Bell,Hui Feng,2022-05-15 Banking on Growth Models contends that China s rapid economic rise from the late 1970s to today has been built on and shaped by a highly politicized and inefficient bank centric financial system Stephen Bell and Hui Feng argue that if the Chinese growth model drives how key economic sectors interact no amount of incremental reform can have much impact on the financial system meaningful reform can stem only from a revised growth model For a time after the global financial crisis it appeared that the expansion of a more market oriented shadow banking system might help sustain China s economic growth Since around 2015 however Xi Jinping s regime has reversed this trajectory and placed China s financial system under heavy state control resulting in slowed economic development and skyrocketing national debt China s market transition and economic rebalancing are now in doubt as is the fate of the nation s economy By pinpointing finance as a vital element of the growth model Bell and Feng provide a convincing assessment of financial risks and the prospects for economic rebalancing in China Banking on Growth Models demystifies the world of Chinese banking and finance as it investigates an ever rising national debt a declining rate of economic growth and the possibility of dire and drastic reform by the Asian superpower s government

Billionaire Democracy George Tyler,2018-01-30 This isn t your America No matter who the president is We re told that when we vote when we elect representatives we re gaining a voice in government and the policies it implements But if that s true why don t American politics actually translate our preferences into higher living standards for the majority of us The answer is that in America the wealthy few have built a system that works in their favor while maintaining the illusion of democracy The reality is that the quality of democracy in the United States is lower than in any other rich democracy on a par with nations such as Brazil or Turkey In the US voters have little influence on eventual policy outcomes engineered by lawmakers Political scientists call it the income bias and attribute it to the power of wealthy donors who favor wage suppression and cuts to important government programs such as public education and consumer protection It causes American lawmakers to compete to satisfy preferences of donors from the top one percent instead of the middle class It s also why our economy has been misfiring for most Americans for a generation wages stagnating and opportunity dwindling The election of Donald Trump shocked the world but for many Americans it came as a stark reflection of mounting frustrations with our current

system and anger at the status quo We need to find a way to fix the way our government serves us The only realistic pathway to improve middle class economics is for Congress and the Supreme Court to raise the quality of American democracy In *Billionaire Democracy The Hijacking of the American Political System* economist George R Tyler lays out the fundamental problems plaguing our democracy He explains how the American democratic system is rigged and how it has eroded the middle class providing an unflinching and honest comparison of the US government to peer democracies abroad He also breaks down where we fall short and how other rich democracies avoid the income bias created by the overwhelming role of money in US politics Finally Tyler outlines practical campaign finance reforms we can adopt when we finally focus on improving the political responsiveness of our government It s time for the people of this nation to demand a government that properly serves us the American people

Asian Revitalization Katie Cummer,2021-01-11 Adaptive reuse refers to reusing an old building for a purpose other than which it was originally built or designed This conservation approach has become increasingly popular around the world However there are few publications that focus on its application in Asia This book fills this gap by looking at both unique and shared aspects of adaptive reuse in three Asian urban centers Hong Kong Shanghai and Singapore Building on government policy documents and extensive field work this book contextualizes adaptive reuse in each city and reveals the impetus behind a wide range of projects from revitalization in Hong Kong commercial development in Shanghai to community building in Singapore The introductory chapter sets adaptive reuse within an international perspective noting salient differences and similarities between Asia and other parts of the world It also anchors the discussion within a regional perspective focusing on the similarities and differences between Hong Kong Shanghai and Singapore Each of the following four essays addresses a specific topic about adaptive reuse including its relationship to urban development and sustainability how it benefits heritage buildings and how it reveals best practices in heritage conservation in Asia The subsequent three essays one for each city

supplemented with timelines set out a clear framework for understanding the city specific case studies that follow the essays Afterwards fifteen representative projects across the three cities are presented as in depth case studies The pairing of essays and case studies provides a detailed understanding of each city s approach to adaptive reuse in the twenty first century a time when the need for sustainable development solutions are at the forefront Intended for classroom use and professional readership this book will be of considerable value in Asia as well as elsewhere providing material for stimulating and worthwhile discussion Asian Revitalization is a highly practical and accessible volume on the long established conservation practice of adaptive reuse in East Asia Its focus on real life issues examples and challenges posed by revitalization programs in the region is extremely relevant to researchers and practitioners in architectural conservation urban design and urban studies Miles Glendinning University of Edinburgh Scotland This is a superb well documented and original book written by some of the best known and highly respected authors in the field of heritage conservation The carefully examined case studies illustrate a wide variety of solutions that highlight the work of some of the best minds of the next generations Alastair Kerr University of Victoria Canada This is a most interesting set of essays informative and thought provoking The best way to save any heritage building is by keeping it in beneficial use and how to achieve this in a sensitive manner is what these essays are about They should be vital reading for anyone considering an adaptive reuse project in Asia Michael Morrison Purcell UK With cultural heritage firmly ensconced in the global development agendas of the United Nations this well grounded volume draws upon the experience of Hong Kong SAR Shanghai and Singapore to demonstrate to scholars and practitioners alike how historic properties can be sustained through savvy adaptive reuse in the midst of tremendous urban redevelopment pressures Montira Horayangura Unakul UNESCO Bangkok Thailand
