developments in Malaysia's dominant party the United Malays National Organisation UMNO and discuss the question of whether UMNO is in fact at an end. The answers to its future lie in part with a better understanding of its past and present. The authors draw attention to issues of party identity, leadership, membership, governance, institutional change, party financing, internal divisions and its relations with different communities and the public at large. The new and expanded edition draws attention to the factors that contributed to UMNO's loss of government in GE14 and potential steps ahead. Not only does this book fill an important gap in the scholarly research on UMNO, this book offers different perspectives on the party's contemporary challenges. This book aims to contribute to understanding, broaden public debate and stimulate further research on arguably one of Malaysia's most important political institutions. *The Politics and Governance of Basic Education* Brian Levy, Robert Cameron, Ursula Hoadley, Vinodhan Naidoo, 2018-09-05. All over the world, economic inclusion has risen to the top of the development discourse. A well-performing education system is central to achieving inclusive development, but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased, but quality remains low, with weaknesses in governance comprising an important part of the explanation. *The Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making progress, combining practical steps to achieve incremental gains to re-orient the system towards learning.
