Congress. House. Committee on Science and Technology (2007). Subcommittee on Research and Science Education, 2008 Data on Federal Research and Development Investments National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Modernizing the Infrastructure of the National Science Foundation Federal Funds Survey, 2010-01-27 Two surveys of the National Science Foundation s Division of Science Resources Statistics SRS provide some of the most significant data available to understand research and development spending and policy in the United States These are the Survey of Federal Funds for Research and Development and the Survey of Federal Science and Engineering Support to Universities Colleges and Nonprofit Institutions These surveys help reach conclusions about fundamental policy questions such as whether a given field of research is adequately funded whether funding is balanced among fields and whether deficiencies in funding may be contributing to a loss of U S scientific or economic competitiveness However the survey data are of insufficient quality and timeliness to support many of the demands put on them In addition the surveys are increasingly difficult to conduct in times of constrained resources and their technological procedural and conceptual infrastructure has not been modernized for procedure or content Data on Federal Research and Development Investments reviews the uses and collection of data on federal funds and federal support for

science and technology and recommends future directions for the program based on an assessment of these uses and the adequacy of the surveys The book also considers the classification structure or taxonomy for the fields of science and engineering

The Faculty Factor Martin J. Finkelstein, Valerie Martin Conley, Jack H. Schuster, 2016-11-01 In an academy squeezed hard by formidable pressures what is the future of the faculty Over the past 70 years the American university has become the global gold standard of excellence in research and graduate education The unprecedented surge of federal research support of the postWorld War II American university paralleled the steady strengthening of the American academic profession itself which managed to attract the best and brightest educators from around the world while expanding the influence of the faculty factor throughout the academic realm But in the past two decades escalating costs and intensifying demands for efficiency have resulted in a wholesale reshaping of the academic workforce one marked by skyrocketing numbers of contingent faculty members Extending Jack H Schuster and Martin J Finkelstein s richly detailed classic *The American Faculty The Restructuring of Academic Work and Careers* this important book documents the transformation of the American faculty historically the leading global source of Nobel laureates and innovation into a diversified and internally stratified professional workforce Drawing on heretofore unpublished data the book provides the most comprehensive contemporary depiction of the changing nature of academic work and what it means to be a college or university faculty member in the second decade of the twenty first century The rare higher education study to incorporate multinational perspectives by comparing the status and prospects of American faculty to teachers in the major developing economies of Europe and East Asia *The Faculty Factor* also explores the redistribution of academic work and the ever more diverse pathways for entering into maneuvering through and exiting from academic careers Using the tools of sociology anthropology and demography the book charts the impact of waves of technological change mass globalization and the severe financial constraints of the last decade to show the impact on the lives and careers of those who teach in higher education The authors propose strategic policy recommendations to extend the strengths of American higher education to retain leadership in the global economy Written for professors adjuncts graduate students and academic political business and not for profit leaders this data rich study offers a balanced assessment of the risks and opportunities posed for the American faculty by economic market driven forces beyond their control
