Student Politics in Africa Luescher, Thierry M., Klemencic, Manja, 2016-05-12 The second volume of the African Higher Education Dynamics Series brings together the research of an international network of higher education scholars with interest in higher education and student politics in Africa Most authors are early career academics who teach and conduct research in universities across the continent and who came together for a research project and related workshops and a symposium on student representation in African higher education governance The book includes theoretical chapters on student organising student activism and representation chapters on historical and current developments in student politics in Anglophone and Francophone Africa and in depth case studies on student representation and activism in a cross section of universities and countries The book provides a unique resource for academics university leaders and student affairs professionals as well as student leaders and policy makers in Africa and elsewhere Nancy Fraser and Participatory Parity

Vivienne Bozalek, Dorothee Hölscher, Michalinos Zembylas, 2020-05-17 Nancy Fraser and Participatory Parity provides a philosophical framework based on the work of Nancy Fraser examining how her ideas can be used to analyse contemporary issues in higher education and reimagine higher education practices Providing a forum for considering Fraser's work in relation to participatory parity in higher education the book shows how her political philosophy is relevant to higher education pedagogies scholarship and practice The recent student protests in South Africa in 2015 and 2016 has created an impetus to think about how to do things differently in higher education in response to economic cultural and political inequities This South African experience is aptly used as a prime example of rethinking issues of coloniality and social injustice in higher education The contributors use of Nancy Fraser's theories provides their analyses and reflections with a particularly sharp lens and clear focus The book also puts her work into conversation with other contemporary writers on social justice and explores the resonances and differentiations of the various approaches This book will be of great interest for academics researchers and post graduate students in the fields of social justice in education and educational policy

Achieving Nelson Mandela University? Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa's higher education sector is rooted in the country's divided past A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges Nelson Mandela University is one of the public universities that emerged from the restructuring process The university is in an ongoing state of evolution of becoming It developed out of the amalgamation of the University of Port Elizabeth Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005 In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located The renaming was conceptualised as more than a marketing opportunity to rebrand the

university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake Endeavouring to be something greater and different from the norm imbues its strategy public statements and practices The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become something else In *Achieving Nelson Mandela University* the university attempts to give an account of itself The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go *Understanding Experiences of First Generation University Students* Amani Bell, Lorri J. Santamaría, 2018-02-22 Over the past few decades universities have opened their doors to students whose parents and grandparents were historically excluded from societal participation and higher education for reasons associated with racial ethnic socio economic and or linguistic diversity Many of these students are first generation or first in their family to attend university While some progress has been made in responding to the needs of these internationally underserved learners many challenges remain This edited book features the unique and diverse experiences of first generation students as they transition into and engage with higher education whilst exploring ways in which universities might better serve these students With reference to culturally responsive and sustaining research methodologies undertaken in Australia Canada New Zealand South Africa the UK and the USA the contributors critically examine how these students demonstrate resilience within university and ways in which success and challenges are articulated Elements that are unique to context and shared across the international higher education milieu are explored The book is replete with diverse student voices and compelling implications for practice and future research The studies featured are centred on underlying theories of identity and intersectionality while valuing student voices and experiences Throughout the emphasis is on using strengths based indigenous and decolonised methodologies Through these culturally sustaining approaches which include critical incident technique participatory learning and action talanoa and narrative inquiry the book explores rich data on first generation student experiences at seven institutions in six countries across four continents

team of scientists set out to measure the distance between the Earth and Moon using lasers It is the sixth ever such venture but the first to be carried out by an African team A man whose horizon was once confined to the perimeter of a chicken coop now handled tools that allowed his eyes to glide over galaxies

Remote Possibilities Amy Jane Conger,2005

The Power Behind Positive Impact Philip Vuyo Kaasi,2014-02-28 If you want your life to be significant and mean something the best thing you should do is to impact other peoples lives Let this book influence you to be an actor instead of an on looker or spectator in life The author wants the reader to study closely the people who were and still are successful and happy so that the reader will realize the faith exercised by these people the failures they endured and the complexity of the process they went through to have acquired their accomplishments You do not have to have the tangible possessions to know that you are wealthy but if you feel and conduct yourself in the manner in which other successful and happy people conduct themselves it will feel as if you do not even need the tangible things because of your dominant state of your mental attitude towards success and happiness Be afraid of giving up whenever faced with an impossible challenge perhaps as far as your mental attitude is concerned God is helping you He is with you He is guiding you and He will see you through Dont be envious and jealous rather admire people who are successful and happy in life Life is a blessing

Governance and the postcolony David Everatt,2019-08-01 Civil society NGOs governments and multilateral institutions all repeatedly call for improved or good governance yet they seem to speak past one another Governance is in danger of losing all meaning precisely because it means many things to different people in varied locations This is especially true in sub Saharan Africa Here the postcolony takes many forms reflecting the imperial project with painful accuracy Offering a set of multidisciplinary analyses of governance in different sectors crisis management water food security universities in different locales across sub Saharan Africa and from different theoretical approaches network to adversarial network governance this volume makes a useful addition to the growing debates on how to govern It steers away from offering a correct definition of governance or from promoting a particular position on postcoloniality It gives no neat conclusion but invites readers to draw their own conclusions based on these differing approaches to and analyses of governance in the postcolony As a robust critical assessment of power and accountability in the sub Saharan context Governance and the Postcolony Views from Africa brings together topical case studies that will be a valuable resource for those working in the field of African international relations public policy public management and administration

Annual Report ... South Africa. Department of Higher Education and Training,2016

Fees Must Fall Susan Booysen,2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by

black consciousness politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and it s double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution This book maps the contours of student discontent a year after the start of the FeesMustFall revolt Student voices dissect colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt
