Cannabis Lucas Richert, Jim Mills, 2021-08-03 Cannabis consumption commerce and control in global history from the nineteenth century to the present day This book gathers together authors from the new wave of cannabis histories that has emerged in recent decades It offers case studies from Africa Asia the Americas Europe and the Middle East It does so to trace a global history of the plant and its preparations arguing that Western colonialism shaped and disseminated ideas in the nineteenth century that came to drive the international control regimes of the twentieth More recently the emergence of commercial interests in cannabis has been central to the challenges that have undermined that cannabis consensus Throughout the determination of people around the world to consume substances made from the plant has defied efforts to stamp them out and often transformed the politics and cultures of using them These texts also suggest that globalization might have a cannabis history The migration of consumers the clandestine networks established to supply them and international cooperation on control may have driven much of the interconnectedness that is a key feature of the contemporary world

National Parks beyond the Nation Adrian Howkins, Jared Orsi, Mark Fiege, 2016-03-31 The idea of a national park was an American invention of historic consequences marking the beginning of a worldwide movement the U S National Park Service asserts in its 2006 Management Policies National Parks beyond the Nation brings together the work of fifteen scholars and writers to reveal the tremendous diversity of the global national park experience an experience sometimes influencing sometimes influenced by and sometimes with no reference whatever to the United States Writer and

historian Wallace Stegner once called national parks America's best idea. The contributors to this volume use that exceptionalist claim as a starting point for thinking about an international history of national parks. They explore the historical interactions and influences intellectual, political, and material within and between national park systems in Canada, New Zealand, South Africa, Indonesia, Antarctica, Brazil, and other countries. What is the role of science in the history of these preserves? Of politics? What purposes do they serve? Conservation? Education? Reverence toward nature? Tourist pleasure? People have thought differently about national parks at different times and in different places, and neat physical boundaries have been disrupted by wandering animals, human movements, the spread of disease, and climate change. Viewing parks around the world at various scales and across national frontiers, these essays offer a panoptic view of the common and contrasting cultural and environmental features of national parks worldwide. If national parks are, as Stegner said, absolutely American, they are no less part of the world at large. *National Parks beyond the Nation* tells us as much about the multifarious and changing ideas of nature and culture as about the framing of those ideas in geographic, temporal, and national terms.
