

FOUNDATIONAL CONCEPTS

Project: a temporary group of related tasks undertaken to create a unique product, service, or result

Program: a group of related projects and operations coordinated together in a larger effort than a project

Portfolio: an organization's entire investment in projects and programs (see diagram 1)

Project Management: using skills, knowledge, and resources to satisfy project requirements

Process: 1 of 47 packages of inputs, tools, and outputs used to produce specific outputs for the project (see diagram 2)

Phases: groups of project activities separated by exit-gates to evaluate phase deliverables

Project Life Cycle: a group of project phases specified by an organization's project management methodology

Methodology: an organization's specific implementation of project processes, a set of steps to manage a project

Triple Constraint: the concept that scope, time, and cost are interrelated; one cannot change without affecting at least one of the others, also known as the "iron triangle" (see diagram 3)

Baseline (BL): the original plan plus all approved changes (scope, schedule, cost)

System: a set of formal management procedures, rules, processes, people, etc. that support an outcome

Historical Information: information from previous projects used to evaluate future project decisions

Lessons Learned: documented variances (historical information) used to avoid variances in future projects

Progressive Elaboration: an iterative approach where planning occurs in cycles rather than only up front

PM Skills: Leading, Communicating, Negotiating, Problem-solving, Influencing, Delegating, and Being Proactive

PROJECT ROLES

Project Manager: the person ultimately responsible for the project; authorized to spend budget and assign resources to realize project goals

Project Coordinator: a role weaker than a project manager; may assign project resources but not authorized to spend funds

Project Expeditor: a role weaker than a project coordinator; reports on project progress without authority to assign resources or spend funds

Project Sponsor: responsible for funding the project; typically a senior manager, may or may not be the customer

Senior Management: a role higher in organization than the project manager; prioritizes projects, authorizes PM, resolves organization conflicts and issues

Stakeholder: a person or group having an interest, whether positive or negative, in the result of the project

Functional Manager: a department manager who "owns" project resources; administers human resource management responsibilities for employees

Project Office: a supporting or controlling department regarding methodologies, tools, standards, best practices, and audits

Program Manager: responsible for programs; coordinating several related projects to achieve a common goal

ORGANIZATION TYPES & PROJECT MANAGER POWER

Functional: team members work for a department; may be loaned to a project at times; little or no PM power

Projectized: PM is manager of projects and resources; has complete authority

Matrix: Combination with functional managers and project managers; PM has more power in Strong Matrix, equal in Balanced Matrix, and less in Weak Matrix

PROCESS FRAMEWORK

Process groups are not project phases. Process groups are not linear; they are iterative. Process names follow verb-noun structure (e.g., Define Scope).
