Pambuccian,Paul Johnston,David Santillo,2008-12-16 The world's oceans cover 70% of the earth's surface and are home to a myriad of amazing and beautiful creatures However the biodiversity of the oceans is increasingly coming under serious threat from many human activities including overfishing use of destructive fishing methods pollution and commercial aquaculture In addition climate change is already having an impact on some marine ecosystems This book discusses some of the major threats facing marine ecosystems by considering a range of topics under chapters discussing biodiversity Chapter 1 fisheries Chapter 2 aquaculture Chapter 3 pollution Chapter 4 and the impacts of increasing greenhouse gas emissions Chapter 5 It goes on to explore solutions to the problems by discussing equitable and sustainable management of the oceans Chapter 6 and protecting marine ecosystems using marine reserves Chapter 7 Presently 76% of the oceans are fully or over exploited with respect to fishing and many species have been severely depleted It is abundantly clear that in general current fisheries management regimes are to blame for much of the widespread degradation of the oceans Many policy makers and scientists now agree that we must adopt a radical new approach to managing the seas one that is precautionary in nature and has protection of the whole marine ecosystem as its primary objective This ecosystem based approach is vital if we are to ensure the health of our oceans for future generations **Artificial Intelligence in Medicine and Surgery** ,2023-12-13 Human history is filled with inventions and other innovations that resulted in a significant and lasting change in our civilization's course of development From gasoline powered vehicles to transistor based electronics or jet airplanes things we now take for granted often appeared suddenly and unexpectedly Yet after their introduction our world changed forever Over the past two decades artificial intelligence AI and machine learning ML have been stealthily increasing their presence in our everyday lives This random systematic adoption process is exposing humanity to something we never previously directly faced an intelligence that may and likely will exceed our own Despite

this most people are not fully aware of current and future benefits limitations and threats related to AI ML Within health care there is little awareness of what AI ML is capable of and how these new capabilities are being implemented or utilized It is this current state that serves as our starting point in the emerging debate on AI ML in medicine and surgery including its integration projected influence and many other considerations that are not that different from other past technology adoption paradigms This book discusses both current trends and future developments in AI and ML across health care
