## **Nepali Guide Class 9:**

**Gender Trouble Makers** Jennifer Rothchild, 2007-05-07 International development efforts aimed at improving girls' lives and education have been well intended somewhat effective but ultimately short sighted and incomplete This is because international development efforts often operate under a reductive understanding of the term gender and how it influences the lives of girls and boys Gender is more commonly conceived by international efforts as characteristics which are ascribed to girls as norms for behaviour In particular the analysis in Gender Trouble Makers focuses on the social constructions of gender and the ways in which gender was reinforced and maintained through a case study in rural Nepal In developing countries like Nepal promoting access to and participation in existing formal education programme is clearly necessary but it is not in itself sufficient to transform gender power relations in the broader society When gender is properly addressed as a process then all stakeholders involved researchers governmental officials and community members can begin to understand and devise more effective ways to increase both girl and boy students enrollment participation and success in school

*Locating the Field* Simon Coleman,Peter Collins,2020-09-09 Are reports of the death of conventional fieldwork in anthropology greatly exaggerated This book takes a critical look at the latest developments and key issues in fieldwork The nature of locality itself is problematic for both research subjects and fieldworkers on the grounds that it must now be maintained and represented in relation to widening and fragmenting social frames and networks Such developments have raised questions concerning the nature of ethnographic presence and scales of comparison From the social space of a cybercafe to cities in India the UK and South Africa among others this book features a wide range of ethnographic studies that provide new ways of looking at the concepts of locality and site It shows that rather than taking key fieldwork processes such as globalization and mobility for granted anthropologists are well placed to examine and critique the totalizing assumptions behind these notions     **Walford's Guide to reference material.** Albert John Walford,1995     **The Rough**
