The Education of Selves Jack Martin, Ann-Marie McLellan, 2013-02-12 Most contemporary North Americans as well as many other Westerners take for granted their conceptions of themselves as individuals with uniquely valuable and complex inner lives lives filled with beliefs imaginings understandings and motives that determine their actions and accomplishments Yet such psychological conceptions of selfhood are relatively recent dating mostly from the late eighteenth century Perhaps more surprisingly our understandings of ourselves as creatively self expressive and strategically self managing are for the most part products of twentieth century innovations in Enlightenment based social sciences especially psychology Fueled by the enthusiasm for self

expression and self actualization that emerged in the 1960s humanistic cognitive developmental and educational psychologists published widely on the overwhelmingly positive consequences of increased self esteem in children and adolescents While previous generations had been wary of self confidence and self interest these qualities became widely regarded as desirable traits to be cultivated in both the home and the school In *The Education of Selves* Jack Martin and Ann Marie McLellan examine ways in which psychological theories research and interventions employed in American and Canadian schools during the last half of the twentieth century changed our understanding of students conceptualizing ideal students as self expressive enterprising and entitled to forms of education that recognize and cater to such expressivity and enterprise The authors address each of the major programs of psychological research and intervention in American and Canadian schools from 1950 to 2000 self esteem self concept self efficacy and self regulation They give critical consideration to definitions and conceptualizations research measures and methods intervention practices and the social cultural consequences of these programs of inquiry and practice The first decade of the twenty first century has seen a backlash against what some have come to regard as a self absorbed generation of young people Such criticism may be interpreted at least in part as a reaction to the scientific and professional activities of psychologists many of whom now appear to share in the general concern about where their activities have left students schools and society at large

International Practices to Promote Budget Literacy Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno, 2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries The underlying presumption is

that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives

A Question of Commitment Thomas Waddock, 2020-04-09 With the adoption of the United Nations Convention on the Rights of the Child 1989 commentators began to situate the evolution of the status of children within the context of the property to persons trajectory that other human rights stories had followed In the first edition of *A Question of Commitment* editors R Brian Howe and Katherine Covell provided a template of analysis for understanding this evolution They identified three overlapping stages of development as children transitioned from being regarded as objects to subjects in their own right social laissez faire paternalistic protection and children's rights In the social laissez faire stage children are regarded as objects and largely as the property of parents In the paternalistic protection stage children are seen as vulnerable and in need of protection The children's rights stage lays emphasis on children as rights bearers as individuals in their own right with entitlements In this second edition new essays assess the extent to which children's rights have been incorporated into their respective areas of policy and law The authors draw conclusions about what the situation reveals about the status of children in Canada Overall many challenges remain on the pathway to full recognition and citizenship Introduction to
