shows the power of untrue societal assumptions in affecting laws that negatively affect a group even though they are based on untruths that are perpetuated by executives focusing mainly on the bottom line of their company control of culture and social learning through media Showing a lack of artistic autonomy artists who sign with major labels often protest the content they are asked to create and release but must comply or remain in predatory contracts Outside of sociology and media studies which give broad overviews of each segment there is no book that presents readers with historical documentation a view of each group from multiple vantage points internal and external and how their history and social perceptions intersect in the music industry system to create crystalized pieces of culture that are filtered through the lens of Capitalism
