Religion in Uniform Edward Waggoner, 2019-10-03 Religion in Uniform argues powerfully that Americans must reform their military's chaplaincy. Americans fund this public project to serve all persons in the armed forces but the chaplaincy currently fails to do so. Waggoner shows that Americans' support for keeping chaplain positions in the military has always rested on a mix of political and religious rationales that continue to evolve. He argues political and theological reasons to eradicate bias, gender discrimination, and sexual violence in the chaplain corps and to stop the use of chaplains in strategic roles abroad. Acknowledging that Christian groups are providing the strongest support for the chaplaincy's status quo, Waggoner contests the specific theological claims that underwrite their policies. He launches a new critical and constructive discussion about US military religion for the twenty-first century.

Special Operations Success James D. Kiras, 2024-10-24 Special Operations Success establishes a new benchmark in military theory in this deeply analytic and innovative work. It answers several pressing questions: How successful have American special operations been over the past quarter century? Are special forces fated to cycles of expansion and misuse? Will special forces invariably exceed the authorities granted to them because of they are? Is a general theory of special operations feasible given the range of activities and conditions that fall under the category? Kiras' work is based on two decades of practical teaching and consulting experience within different special operations communities, and its analysis and conclusions are designed to inform practitioners, policymakers, educators, and the general public. The book develops a framework in the form of a theory comprising capabilities and control for the comprehensive evaluation of special operations success and is divided into three parts. Part I lays the foundation for a general theory of special operations. Part II explores the two component parts of theory: capabilities and control. Part III uses various aspects of the theory, depending on available information, to assess the success of special operations over a twenty-year period in the United Kingdom, South Africa, and the United States.

Interconnecting the Violences of Men Kate Seymour, Bob Pease, Sofia Strid, Jeff Hearn, 2024-11-04 This book aims to expand and enrich understandings of violences by focusing on gendered continuities interconnections and intersections across multiple forms and manifestations of men's violence In actively countering both the compartmentalisation of studies of violence by type and form and the tendency to conceptualise violence narrowly it aims to flesh out not delimit understandings of violence Bringing together cross disciplinary indeed transdisciplinary perspectives this book addresses how what are often seen as specific and separate violences connect closely and intricately with wider understandings of violence how there are gendered continuities

between violences and how gendered violences take many forms and manifestations and are themselves intersectional. Grounded by the recognition that violence is itself a form of inequality, the contributors to this volume traverse the intersectional complexities across both experiences of violent inequality and what is seen to count as violence. The international scope of this book will be of interest to students and academics across many fields including sociology, criminology, psychology, social work, politics, gender studies, child and youth studies, military and peace studies, environmental studies, and colonial studies, as well as practitioners, activists, and policymakers engaged in violence prevention.

Conflict Dynamics Alethia H. Cook, Marie Olson Lounsbery, 2017-05-15. *Conflict Dynamics* presents case studies of six nation states: Sierra Leone, the Republic of Congo, Sri Lanka, Myanmar, Indonesia, and Peru. In the book, Alethia H. Cook and Marie Olson Lounsbery examine the evolving nature of violence in intrastate conflicts, as well as the governments and groups involved, by focusing on the context of the relationships involved, the capacities of the conflict's participants, and the actors' goals. The authors first present a theoretical framework through which the changeable mix of relative group capacities and the resulting tactical decisions can be examined systematically, and as conflicts evolve over time. They then apply that framework to the six case studies to show its usefulness in better understanding conflicts individually and in comparison. While previous research on civil wars has tended to focus on causes and outcomes, *Conflict Dynamics* takes a more comprehensive approach to understanding conflict behavior. The shifting nature of relative group capacity, measured in many different ways, coupled with dynamic group goals, determines the tactical decisions of civil war actors and the paths a rebellion will take. The case studies illustrate the relevance of third parties to this process and how their interventions can influence tactics. The progression of violence in conflicts is inextricably linked to the decisions made in their midst. These influence future iterations of the conflictual relationship. Complex groups on both sides both drive and are driven by the decisions made. Understanding conflicts requires that these reciprocal impacts be considered. The comparative framework demonstrated in this book allows one to flesh out this complexity.
