Intra-Africa Migrations Inocent Moyo, Jussi P. Laine, Christopher Changwe Nshimbi, 2021-02-21 This book discusses regional and continental integration in Africa by examining the management of migration across the continent It examines borders and securitisation of migration and the challenges and opportunities that arise out of reconfigured continental demographics The book offers insights on intra Africa migrations and highlights how

intra continental migration creates socio economic and cultural borders It explores how these borders beyond the physical boundaries of states including the Berlin Conference constructed borders create cultural divides challenges for economic integration and cross border security and irregular migration patterns While the movement of economic goods is valued for regional economic integration the mobility of people is seen as a threat This approach to migration contradicts the intentions of true integration and development and triggers negative responses such as xenophobia that cannot be addressed by simply managing the physical border and allowing free movement This book engages in a pivotal discussion of these issues which are hitherto missing in African border studies by demonstrating the ubiquity and overreaching influence of various kinds of borders on the African continent With multidisciplinary contributions that provide an in depth understanding of intra Africa migrations and strategies for enhanced migration management this book will be a useful resource for scholars and students studying geography politics security studies development studies African studies and sociology

Mission Formations and Hybrid Wars Thomas Vladimir Brønd, Uzi Ben-Shalom, Eyal Ben-Ari, 2020-10-25 This volume explores and develops new social scientific tools for the analysis and understanding of contemporary military missions in theatre. Despite the advent of new types of armed conflict the social scientific study of militaries in action continues to focus on tools developed in the hey day of conventional wars. These tools focus on such classic issues as cohesion and leadership, communication and unit dynamics or discipline and motivation. While these issues continue to be important, most studies focus on organic units up to and including brigades. By contrast, this volume suggests the utility of concepts related to mission formations as opposed to units or components to better capture the ongoing processual nature of the amalgamations and combinations that military involvement in conflicts necessitates. The study of these formations by the social sciences—sociology, social psychology, anthropology, political science and organization science—requires the introduction of new analytical tools to the study of militaries in theatre. As such, this volume utilizes new approaches to social life, organizational dynamics and to armed violence to understand the place of the armed forces in contemporary conflicts and the new tasks they are assigned. This book will be of much interest to students of military studies, sociology, security studies and International Relations in general.

Workers' Movements and Strikes in the Twenty-First Century Jörg Nowak, Madhumita Dutta, Peter Birke, 2018-04-05 While workers' movements have been largely phased out and considered out dated in most parts of the world during the 1990s, the 21st century has seen a surge in new and unprecedented forms of strikes and workers' organisations. The collection of essays in this book, spanning countries across global South and North, provides an account of strikes and working class resistance in the 21st century. Through original case studies, the book looks at the various shades of workers' movements, analysing different forms of popular organisation as responses to new social and economic conditions such as restructuring of work and new areas of investment.
