Cheng, J. H. Wang, L. Liang, W. H. Fung Ivan, 2020-04-20 Numerical Methods and Implementation in Geotechnical Engineering explains several numerical methods that are used in geotechnical engineering. The second part of this reference set includes more information on the distinct element method, geotechnical optimization, analysis, and reliability analysis. Information about relevant additional numerical methods is also provided in each chapter with problems where applicable. The authors have also presented different computer programs associated with the materials in this book set which will be useful to students learning how to apply the models explained in the text into practical situations when designing structures in locations with specific soil and rock settings. This reference book set is a suitable textbook primer for civil engineering students as it provides a basic introduction to different numerical methods, classical and modern, in comprehensive, readable volumes.

Resilient, Sustainable and Smart Ballasted Railway Track Yunlong Guo, Guoqing Jing, 2025-07-01. Resilient Sustainable and Smart Ballasted Railway Track explores the optimization of railway ballast tracks to achieve resilience, sustainability and intelligence in railway infrastructure. It summarizes and examines new technologies and developments that address unresolved rapid defects in track components such as rail damage, track stability, ballast flight and ballast fouling. This book discusses the application of innovative materials derived from waste and recycled railway components including derived aggregates, recycled ballast, Neoballast and polyurethane, often referred to as ballast glue. This book examines state-of-the-art structural health monitoring techniques such as smart sleepers, interferometric synthetic aperture radar, ground penetrating radar and inspection robots. Includes research methodologies and directions for optimizing track structure, applying new materials and incorporating new AI and inspection technologies. Covers the basic principles and technologies of railway structures to enhance an understanding of railway engineering. Provides information on railway asset management and solutions for railway infrastructure issues for the industry, railway managers and other stakeholders.

Landslide: Susceptibility, Risk Assessment and Sustainability Gopal Krishna Panda, Rajib Shaw, Subodh Chandra Pal, Uday Chatterjee, Asish Saha, 2024-05-14. The book illustrates a geospatial and geostatistical approach to data analysis, modeling, risk assessment and visualization as well as landslide hazard management in the hilly region. This book investigates cutting-edge methodologies based on open source software and R statistical programming and modeling in current decision-making procedures with a particular emphasis on recent advances in data mining techniques and robust modeling in torrential rainfall and earthquake-induced landslide hazard.
