Technical Note ,1986 **Structural Foundation Designers' Manual** W. G. Curtin, Gerry Shaw, Gary Parkinson, J.
Golding, Norman Seward, 2006-12-04 This manual for civil and structural engineers aims to simplify as much as possible a
complex subject which is often treated too theoretically by explaining in a practical way how to provide uncomplicated
buildable and economical foundations It explains simply clearly and with numerous worked examples how economic
foundation design is achieved It deals with both straightforward and difficult sites following the process through site
investigation foundation selection and finally design The book includes chapters on many aspects of foundation engineering
that most other books avoid including filled and contaminated sites mining and other man made conditions features a step by
step procedure for the design of lightweight and flexible rafts to fill the gap in guidance in this much neglected yet extremely
economical foundation solution concentrates on foundations for building structures rather than the larger civil engineering
foundations includes many innovative and economic solutions developed and used by the authors practice but not often
covered in other publications provides an extensive series of appendices as a valuable reference source For the Second
Edition the chapter on contaminated and derelict sites has been updated to take account of the latest guidelines on the
subject including BS 10175 Elsewhere throughout the book references have been updated to take account of the latest
technical publications and relevant British Standards *Manual* New York Society of Architects, 1925 **Manual: New**
