Cognitive Diagnostic Models: Methods for Practical Applications Tao Xin, Chun Wang, Ping Chen, Liu Yanlou, 2022-05-06

Digital participation and communication disorders across the lifespan Petra Jaecks, Hendrike Frieg, Kristina Jonas, 2024-05-17 **Mapping actors along value chains** Stein, C., Barron, Jennie, 2017-12-12 Engagement with Culture in Transformative Times Susanne Janssen, Nete Kristensen, Marc Verboord, 2025-05-12 At the heart of this volume are the questions What does culture mean to European citizens in the face of globalisation digitalisation diversity and social inequality How do Europeans engage with culture in its various forms and what societal values are tied to this cultural engagement These questions are explored in depth across the 15 chapters of this book By delving into the understandings practices perceptions affordances and impacts of culture this book advances the study of the societal values of culture in contemporary European societies offering insights beneficial to both research and cultural policy work The book stands out with its five unique features It embraces an inclusive conception of culture spanning the arts popular culture and everyday cultural practices both offline and online It takes a grassroots approach starting from the cultural understandings and experiences of European citizens It employs a comparative method involving people from diverse socio economic groups in nine European countries with different cultural policy models social structural features socio cultural value orientations and media systems It builds on a multi and mixed methods approach including a large scale survey a smartphone study with experimental stimuli several phases of online content data collection and analysis qualitative interviews and focus groups

Finally it delves into how wide ranging and interconnected sociocultural transformations such as migration digitalisation and social inequality impact people's understanding of and engagement with culture as well as the meanings and values they attribute to culture. These unique features promise to offer a fresh and comprehensive perspective on cultural engagement in contemporary European societies. The collection showcases the multiple often contradictory concepts and understandings of culture and its societal values among social groups within and across European societies. The findings call for a social turn in cultural policy that extends beyond traditional arts and culture to support diverse cultural expressions that may enhance social values, address complex social issues and shift the focus from economic objectives to promoting civic solidarity, equity, inclusivity, tolerance and shared community values.

Mapping Identity-Induced Marginalisation in India Raosaheb K Kale, Sanghmitra S Acharya, 2022-08-17

This book discusses the issues of inequality and marginalization in India. The first section of the book contextualizes sociological traditions for the scrutiny of subaltern discourse on discrimination. The chapters in the section explore self-identity margins in sociological traditions, subalternity and exclusion, citizenship issues of denotified tribes, the role of religion for scheduled tribes, Dalits and Ambedkar's ideas on tribes. The second section deals with the political economy of higher education, health and employment. The efforts of B.R. Ambedkar and the consequences of those efforts, his critique of education policies during British time and its alteration for independent India have been meticulously dealt with. The third section illustrates an application of theoretical understanding through narratives of labour bondage in Varanasi sanitation workers in Mumbai and rickshaw pullers in Delhi. The last section establishes that unequal access to resources is a consequence of discrimination and marginalization induced by social identities. The book argues for equitable access to resources and opportunities to ensure health equity. The audience for this publication includes academics, researchers, health professionals, policymakers engaged with discrimination, exclusion, marginalization and inequity in health.

Coasts and Estuaries Eric Wolanski, John W. Day, Michael Elliott, Ramachandran Ramesh, 2019-01-24

Coasts and Estuaries: The Future provides valuable information on how we can protect and maintain natural ecological structures while also allowing estuaries to deliver services that produce societal goods and benefits. These issues are addressed through chapters detailing case studies from estuaries and coastal waters worldwide, presenting a full range of natural variability and human pressures. Following this, a series of chapters written by scientific leaders worldwide synthesizes the problems and offers solutions for specific issues graded within the framework of the socio-economic environmental mosaic. These include fisheries, climate change, coastal megacities, evolving human-nature interactions, remediation measures and integrated coastal management. The problems faced by half of the world living near coasts are truly a worldwide challenge as well as an opportunity for scientists to study commonalities and differences and provide solutions. This book is centered around the proposed DAPSI W R M framework.

where drivers of basic human needs requires activities that each produce pressures The pressures are mechanisms of state change on the natural system and Impacts on societal welfare including well being These problems then require responses which are the solutions relating to governance socio economic and cultural measures Scharin et al 2016 Covers estuaries and coastal seas worldwide integrating their commonality differences and solutions for sustainability Includes global case studies from leading worldwide contributors with accompanying boxes highlighting a synopsis about a particular estuary and coastal sea making all information easy to find Presents full color images to aid the reader in a better understanding of details of each case study Provides a multi disciplinary approach linking biology physics climate and social sciences
