**The Science Business** Gary P. Pisano, 2006      **Business Modeling for Life Science and Biotech Companies** Alberto Onetti, Antonella Zucchella, 2014-03-21 Most books on the biotechnology industry focus on scientific and technological challenges ignoring the entrepreneurial and managerial complexities faced by entrepreneurs The Business Models for Life Science Firms aims to fill this gap by offering managers in this rapid growth industry the tools needed to design and implement an effective business model customized for the unique needs of research intensive organizations Onetti and Zucchella begin by unpacking the often used business model term examining key elements of business model conceptualization and offering a three tier approach with a clear separation between the business model and strategy focus exploring the different activities carried out by the organization locus evaluating where organizational activities are centered and modus testing the execution of the organization's activities The business model thus defines the unique way in which a company delivers on its promise to its customers The theory and applications adopt a global approach offering business cases from a variety of biotech companies around the world

**The Routledge Handbook of the Political Economy of Science** David Tyfield, Rebecca Lave, Samuel Randalls, Charles Thorpe, 2017-04-28 The political economy of research and innovation R I is one of the central issues of the early twenty first century Science and innovation are increasingly tasked with driving and reshaping a troubled global economy while also tackling multiple overlapping global challenges such as climate change or food security global pandemics or energy security But responding to these demands is made more complicated because R I themselves are changing Today new global patterns of R I are transforming the very structures institutions and processes of science and innovation and with it their claims about desirable futures Our understanding of R I needs to change accordingly Responding to this new urgency and uncertainty this handbook presents a pioneering selection of the growing body of literature that has emerged in recent years at the intersection of science and technology studies and political economy The central task for this research has been to expose important but consequential misconceptions about the political economy of R I and to build more insightful approaches This volume therefore explores the complex interrelations between R I both in general and in specific fields and political economies across a number of key dimensions from health to environment and universities to the military The Routledge Handbook of the Political Economy of Science offers a unique collection of texts across a range of issues in this burgeoning and important field from a global selection of top scholars The handbook is essential reading for students interested in the political economy of science technology and innovation It also presents succinct and insightful summaries of the state of the art for more advanced scholars

**Studies in the Physical and Biological Sciences**, 2007 *The Recombinant University* Doogab Yi, 2015-03-23 The advent of recombinant DNA technology in the 1970s was a key moment in the history of both biotechnology and the commercialization of academic research Doogab Yi's *The Recombinant University* draws us deeply into the academic community in the San Francisco Bay Area where the technology was developed and adopted as the first major commercial technology for genetic engineering In doing so it reveals how research patronage market forces and legal developments from the late 1960s through the early 1980s influenced the evolution of the technology and reshaped the moral and scientific life of biomedical researchers Bay Area scientists university administrators and government officials were fascinated by and increasingly engaged in the economic and political opportunities associated with the privatization of academic research Yi uncovers how the attempts made by Stanford scientists and administrators to demonstrate the relevance of academic research were increasingly mediated by capitalistic conceptions of knowledge medical innovation and the public interest Their interventions resulted in legal shifts and moral realignments that encouraged the privatization of academic research for public benefit *The Recombinant University* brings to life the hybrid origin story of biotechnology and the ways the academic culture of science has changed in tandem with the early commercialization of recombinant DNA technology Betting on

Biotech Joseph Wong, 2011-10-15 After World War II several late developing countries registered astonishingly high growth rates under strong state direction making use of smart investment strategies turnkey factories and reverse engineering and taking advantage of the postwar global economic boom Among these economic miracles were postwar Japan and in the 1960s and 1970s the so called Asian Tigers Singapore South Korea and Taiwan whose experiences epitomized the analytic category of the developmental state In Betting on Biotech Joseph Wong examines the emerging biotechnology sector in each of these three industrial dynamos They have invested billions of dollars in biotech industries since the 1990s but commercial blockbusters and commensurate profits have not followed Industrial upgrading at the cutting edge of technological innovation is vastly different from the dynamics of earlier practices in established industries The profound uncertainties of life science based industries such as biotech have forced these nations to confront a new logic of industry development one in which past strategies of picking and making winners have given way to a new strategy of throwing resources at what remain very long shots Betting on Biotech illuminates a new political economy of industrial technology innovation in places where one would reasonably expect tremendous potential yet where billion dollar bets in biotech continue to teeter on the brink of spectacular failure

**Incerto** NASSIM NICHOLAS. TALEB, 2021-05-04 The landmark five book series all together in one boxed set The Incerto is an investigation of opacity luck uncertainty probability human error risk and decision making when we don't understand the world expressed in the form of a personal essay with autobiographical sections stories parables and philosophical historical and scientific discussions in non overlapping volumes that can be accessed in any order The main thread is that while there is inordinate uncertainty about what is going on there is great certainty as to what one should do about it This boxed set includes FOOLED BY RANDOMNESS THE BLACK SWAN THE BED OF PROCRUSTES ANTIFRAGILE SKIN IN THE GAME

massive impact and after the fact we concoct an explanation that makes it appear less random and more predictable The astonishing success of Google was a black swan so was 9 11 In this groundbreaking and prophetic book Taleb shows that black swan events underlie almost everything about our world from the rise of religions to events in our own personal lives and yet we especially the experts are blind to them FOOLED BY RANDOMNESS Fooled by Randomness is to conventional Wall Street wisdom approximately what Martin Luther s ninety five theses were to the Catholic Church Malcolm Gladwell The New Yorker Are we capable of distinguishing the fortunate charlatan from the genuine visionary Must we always try to uncover nonexistent messages in random events Fooled by Randomness is about luck more precisely about how we perceive luck in our personal and professional experiences Set against the backdrop of the most conspicuous forum in which luck is mistaken for skill the markets Fooled by Randomness is an irreverent eye opening and endlessly entertaining exploration of one of the least understood forces in our lives THE BED OF PROCRUSTES Taleb s crystalline nuggets of thought stand alone like esoteric poems Financial Times This collection of aphorisms and meditations expresses Taleb s major ideas in ways you least expect The Bed of Procrustes takes its title from Greek mythology the story of a man who made his visitors fit his bed to perfection by either stretching them or cutting their limbs With a rare combination of pointed wit and potent wisdom Taleb plows through human illusions contrasting the classical views of courage elegance and erudition against the modern diseases of nerdiness philistinism and phoniness
