**The Five-Factor Model of Personality Across Cultures** Robert R. McCrae, Juri Allik, 2012-12-06. ROBERT R MCCRAE: it is simply personality research conducted in different countries. The implicit assumption behind this practice is that personality processes are universal and where they are studied is thus of no consequence. An insensitivity to cultural context once imputed mostly to Americans, now

appears to characterize the field worldwide Fortunately recent years have also seen a rise of interest in studies of personality and culture Church 2001 Church Lee McCauley McCrae 2000 What do these new studies show Are personality processes indeed universal or are there significant variations across cultures that necessitate a more nuanced approach to research There is as yet no definitive answer to that question In some respects human personality does seem to transcend the boundaries of language and culture in other respects it is profoundly influenced by social and historical forces Sorting these issues out must be a priority for our field if we are to understand the current personality literature *Personality Assessment* Robert P.
