

S7 Service 1 Course (ST-SERV1)

Short Description

This course introduces the customer to a Siemens integrated automation system. Participants will build skills on commissioning, troubleshooting and upgrading an automation system complete with HMI, PLC, drive and communications network. Students will learn to navigate STEP7, use the built-in diagnostics tools and perform basic program modifications. Profibus DP configuration and troubleshooting are included using remote I/O, a touch panel display and a drive system. The course format is a combination of instruction and hands-on exercises. A realistic conveyor model is used for demonstrations and participant exercises. Exercises allow students to practice tasks such as testing, debugging and using diagnostic tools.

[Also available as Online-Training](#)

Objectives

On completion of this course the participant will be able to:-
Identify the components and performance characteristics of the SIMATIC S7-300/400 PLC
Install a PLC system, including the communication cabling and wiring of I/O.
Use the various address types to edit, reload, structure and run a program. Document, test, and basically troubleshoot the control system and its program.
Diagnose and repair simple hardware problems.
Utilize binary operations, timers, counters, comparators, and arithmetic operations for program modifications.
