Hand-held trace detector for explosives, chemical agents, toxic industrial chemicals or narcotics

Chemical Detection
Product of the Year Award

For those who work tirelessly to protect the public, every day presents a new challenge. What will you be faced with today? Strange odors? Suspicious packages? Drugs?

You need to have an instrument that can detect the widest range of substances. Smiths Detection is proud to introduce the next generation of hand-held trace detectors – the SABRE 4000 – the only portable trace detector that can detect threats from explosives, chemical warfare agents, toxic industrial chemicals or narcotics.

The SABRE 4000 can detect and identify over 40 of these threat substances in approximately 15 seconds. With a cold start time of 10 minutes and weighing approximately 7 pounds including the 4-hour battery, the SABRE 4000 is a small, powerful ally in the war on terror and drug trafficking.

With the added TIC detection capability, new features such as the 3.5" color TFT display and standard 4-hour battery, the SABRE 4000 is still the smallest, lightest hand-held trace detector available. It is also the only one that can detect and identify all the threats facing you.
