more than three decades and people of all ages are spending an increasing amount of time and money on these technologies. More recent is the rise of a vibrant research community focusing on gaming and entertainment applications. Driven by the growth and the coming of age of the gaming industry and by its increasing recognition in the media and the minds of the broader public, the study of computer games, game development and experiences is attracting the interest of researchers from very diverse fields: social sciences, computing, electrical engineering, design, etc. Research of this kind looks to extend the boundaries of gaming technologies. In a relentless drive for innovation, it looks to create and understand an ever increasing range of experiences and examine how games can provide value for educational, therapeutic and other serious purposes. These themes were reflected in the call for participation and eventually the papers accepted for presentation. The Fun n Games conference was the second event of a bi-annual series of conferences. The first event of the series was held in Preston in 2006, organized by the University of Central Lancashire. Following the success of this event, it was decided to run a follow up.

Originally published in 1992 and based on two theoretical approaches, the Global Commodity Chain and the Global Production Network, this book investigates the multitude of processes as well as diverse consequences of global integration upon industries, regions, enterprises and employees. In doing so, it draws from the experience of Western and Eastern and South-eastern Europe. These European cases are complemented with evidence from Kenya, Thailand as well as US, China, India and Mexico. The book explores multiple causes of decentralization, arguing beyond the pursuit of cheap and adaptable labour. It goes on to argue that the effects of delocalization within Europe, unlike those in the rest of the developed world, are less negative than usually portrayed. It concludes by putting forward recommendations for best future practice of successful adjustment strategies and examines how these might be adopted elsewhere in the world.      **The Korean Electronics Industry** Michael Pecht, 2020-07-24.
