Safe, steady and smooth running

① Emergency brake device

When the electric force falls short of supply or it acts any of the safety device, the brake function goes into effect by the safety device through the spring resilience action, the escalator (moving walk) stopped for running accordingly.

② Drive-chain breaking protection

When the drive-chain has been over-stretched or it is broken, the escalator (moving walk) will automatically stop for running.

③ Skirt panel brush

The brush that has been installed between the skirt panel and the step will prevent the shoes of passengers from touching the skirt panel.

④ Step (tread) sunk protection device

When there is abnormal step bending, the escalator (moving walk) will be stopped for running before the step entering into the comb plate.

⑤ Step illumination

Illumination exists in the upper and lower ends of the escalator, in the lower part of the step in order to remind the passenger of the security matters.
