

School Uniform: Correlation between Wearing Uniforms and Academic Performance

 Exclusively available on IvyPanda

Introduction

Earlier researches have indicated that there is a strong positive correlation between wearing of uniforms and academic performance. Furthermore the use of uniforms has had a control on social behavior. Decency is of the essence for any scholar or even worker. The issue of putting on a uniform in the different spheres of life cannot be underrated, it should instead be taken with due importance.

Different countries in the world have their own standardized mode of dressing depending on their cultures, religion or social class. For any successful learning institution, the selection criterion for a uniform is an aspect that should be taken with great consideration. The combination of colors for example, may affect the students' comfort as well as the public view and perception of the institution (Daugherty 392)

The issue of cost should also be put in to check. This is because in many third world countries like Lesotho, it was found that school drop out rate is very high due to the fact that many families cannot afford the high price of uniforms. Other countries have no regard for school uniforms due to their past history. A good example is Italy where children were forced to wear uniforms in and out of school during the Second World War.

Behavior and School Uniforms

Dropping out and breaking laws tend to be the common responses for students who have negative experiences in school. Schools are supposed to offer a constructive, positive, secure and safe environment for learning. Students should feel protected enough to discover, explore and build up their scholarly and social competencies.

School Uniforms. Research Brief Karen Walker, 2007 Does clothing make the person or does the person make the clothing How does what attire a student wears to school affect their academic achievement In 1996 President Clinton cited examples of school violence and discipline issues that might have been avoided had the students been wearing uniforms School uniforms Prevention or suppression In his 1998 State of the Union address he mentioned the positive impact uniforms had made in the Long Beach Unified School District which has a highly diverse ethnic and socioeconomic population that is also the third largest district in California When students have continuous negative experiences in school dropping out and delinquency tend to be the common responses The role of schools is to provide a positive safe and secure learning environment where students feel protected enough to explore and develop their intellectual and social competencies Hard evidence that proves the wearing of uniforms provides a direct link to better academic achievement is not conclusive however there is evidence that supports there are fewer discipline problems referrals and violence as well as higher attendance rates since the implementation of a uniform policy What appears to have been overlooked in the data analysis is the effect of other programs that are often being implemented at the same time as the uniform policy and may also have a direct impact on the discipline and attendance issues There are many arguments for and against school uniform policies The pros and cons of school uniform are listed in this paper Contains 14 online resources *Research Papers* William Coyle, Joe Law, 2007 The first and still the best research worktext for students Research Papers leads students through the step by step process of writing research papers from initial research to final proofreading This unique spiral bound manual gives students a wealth of examples as well as exercises that provide hands on practice in the academic writing process Up to the minute sections on documentation plagiarism and online research make Research Papers the most current resource available to today's students *Research Report* University of South Africa. Realizing the Full Potential of Social Safety Nets in Africa Kathleen Beegle,Aline Coudouel,Emma Monsalve,2018-07-02 Poverty remains a pervasive and complex phenomenon in Sub Saharan Africa Part of the agenda in recent years to tackle poverty in Africa has been the launching of social safety nets programs All countries have now deployed safety net interventions as part of their core development programs The number of programs has skyrocketed since the mid 2000s though many programs remain limited in size This shift in social policy reflects the progressive evolution in the understanding of the role that social safety nets can play in the fight against poverty and vulnerability and more generally in the human capital and growth agenda Evidence on their impacts on equity resilience and opportunity is growing and makes a foundational case for investments in safety nets as a major component of national development plans For this potential to be realized however safety net programs need to be significantly scaled up Such scaling up will involve a series of technical considerations to identify the parameters tools and processes that can deliver maximum benefits to the poor and vulnerable However in addition to technical considerations and at least as importantly this report argues that a series of decisive shifts need to occur in three other critical spheres political institutional and fiscal First the political processes that shape the extent and nature of social policy need to be recognized by stimulating political appetite for safety nets choosing politically smart parameters and harnessing the political impacts of safety nets to promote their sustainability Second the anchoring of safety net programs in institutional arrangements related to the overarching policy framework for safety nets

the functions of policy and coordination as well as program management and implementation is particularly important as programs expand and are increasingly implemented through national channels And third in most countries the level and predictability of resources devoted to the sector needs to increase for safety nets to reach the desired scale through increased efficiency increased volumes and new sources of financing and greater ability to effectively respond to shocks This report highlights the implications which political institutional and fiscal aspects have for the choice and design of programs Fundamentally it argues that these considerations are critical to ensure the successful scaling up of social safety nets in Africa and that ignoring them could lead to technically sound but practically impossible choices and designs **Basic**
