Essays on Peripheral Nerve Repair and Regeneration Stefano Geuna, Pierluigi Tos, Bruno Battiston, 2009-08-10

Interest in the study of peripheral nerve repair and regeneration has increased significantly over the last twenty years and today the number of nerve reconstructions performed is progressively increasing due to the continuous improvement in surgical technology and to the spread of microsurgical skills among surgeons worldwide This volume of International Review of Neurobiology provides an overview of the state of the art knowledge in peripheral nerve repair and regeneration by bringing together a number of reviews that critically address some of the most important issues in this biomedical field New advances in the field of nerve regeneration Hui Lu, Wenchuan Zhang, Shizhang Ling, Bo-Zong Shao, Olga Aleinikova, Xiaofeng Yang, 2025-02-17 Nerve regeneration refers to the regeneration or repair of nerve tissue cells or cell products This mechanism may include the production of new neurons glia axons myelin sheaths or synapses Nerve regeneration is clinically important because it is part of the pathogenesis of many diseases Due to the high incidence of nerve damage nerve regeneration and repair are becoming a rapidly developing field The peripheral nervous system PNS and central nervous system CNS are involved in different functional mechanisms The peripheral nervous system has the intrinsic ability to repair and regenerate while the central nervous system largely lacks the ability to repair and regenerate itself Theories about nervous system regeneration still need to be studied Much research is still needed to optimize the environment to realize the regenerative potential of nerves *Surgical Treatment of Peripheral Neuropathic Pain, Peripheral Nerve Tumors, and Peripheral Nerve Injury* Hui Lu, Shizhang Ling, Lei Xu, 2023-09-12 *Nerves and Nerve Injuries* R. Even the best hernia repair can result in postoperative difficulties for the patient caused by repair sequelae as for example pain infertility infection adhesion and dislocation of the prostheses That can happen many years later and now where the general principle of hernia repair is well understood all over the world these sequelae are noticed more and more To define them to evaluate the absolute and relative risk of these sequelae and to describe the ways of their prevention diagnosis and treatment the 5th Suvretta meeting had focussed on this subject We discussed if there s a principle risk by technique material or both The results of these discussions and the future handling and evaluation of this problem was the aim of this meeting Even the best method can be made better by optimization of its single components Even the best hernia repair can result in postoperative difficulties for the patient caused by repair sequelae such as pain infertility infection adhesion and dislocation of the prostheses This can happen many years later and now that the general principle of hernia repair is broadly understood all over the world these sequelae are being noticed more and more The 5th Suvretta meeting was held in order to define these sequelae to evaluate the absolute and relative risks they pose and to discuss the methods of their prevention diagnosis and treatment We discussed whether the principal risk was related to technique material or both This discussion and the future approach to and evaluation of this problem were the aims of the meeting working on the premise that even the best method can be made better by optimizing its individual components A Practical Guide to Canine and Feline
