OBSERVATIONS CONCERNING DIGNIFIABLE QUESTIONS ABOUT AMERICAN HIGHER EDUCATION

Ekkehard-Teja Wilke,2023-06-25 The United States is blessed with thousands of institutions of post secondary education Integrity is alive at all levels Learning takes place American higher education is a stupendous achievement with a proud tradition No area in the world is likely to claim better schools and a better record Hundreds of small institutions with less than 1000 students some public some private independent some denominational some comprehensive others program selective represent and live the spirit of a community of learning But it is also true that the system of American higher education just as American democracy is confronted with challenges and threats As the the Secretary of the U S Department of Education has recently in August 2022 observed The system was never completely right side up He talked of a post secondary purgatory of a ranking system that is a joke and called for a cultural change in higher education NOW These

challenges and threats need to be addressed now while it is still hopefully time to avert potentially catastrophic consequences Just as democratic institutions are likely to be misused and need constant critical vigilance so educational institutions need active constant attention and engaged maintenance The experiences described in these chapters while accurate do not reflect comprehensively the state of post secondary American education But glaring defects and negative tendencies do exist and continue at all levels and to a degree that demands informed awareness and action The quantitative leap in the student population after 1945 accelerated positive and negative developments Opportunity of education is available but hardly equal opportunity Higher education seems to have become unduly influenced by interests and considerations destructive of quality education Changes need to be considered and consensually implemented now in order to minimize intended and unintended negative consequences

Reframing Diversity in Education Joan Poliner Shapiro,Trevor E. Sewell,Joseph P. DuCette,2001 Now in Paperback Demographic changes in the U S are increasing and accelerating diversity This book provides an in depth review and analysis of student diversity and how these differences affect learning Diversities in race gender culture social class and learning ability are examined and assessment and multiple intelligences are explored
