works on science published during 1874-78 *The Science of Sailing: A complete guide to the physics of sailing and the naval architecture governing the performance of sailing yachts* Peter van Oossanen, 2020-01-01 Part 4 of the Science of Sailing addresses the phenomena and drag arising from the air-water interface experienced by sailing craft. The topics that are dealt with are wave causation and its consequences on drag, the properties of regular waves in deep and shallow water, the wave pattern generated by the hull of sailing craft, wave drag, interference of wave systems, running trim and sinkage, rise, breaking waves, spray, wind-generated waves and spectra, motions displayed by sailing yachts, wave-added drag, surfing behaviour, cavitation and ventilation **Experimental science. Gavrilova, Vipin Kumar, Youngsong Mun, C.J. Kenneth Tan, Osvaldo Gervasi, 2004-04-29 The natural mission of Computational Science is to tackle all sorts of human problems and to work out intelligent automata aimed at alleviating the burden of working out suitable tools for solving complex problems. For this reason Computational Science, though originating from the need to solve the most challenging problems in science and engineering, computational science is the key player in the fight to gain fundamental advances in astronomy, biology, chemistry, environmental science, physics, and several other scientific and engineering disciplines. It is increasingly turning its attention to all fields of human activity. In all activities, in fact, intensive computation, information handling, knowledge synthesis, the use of ad hoc devices, etc., increasingly need to be exploited and coordinated regardless of the location of both the users and the various and heterogeneous computing platforms. As a result, the key to understanding the explosive growth of this discipline lies in two adjectives that more and more appropriately refer to Computational Science and its applications: interoperable and ubiquitous. Numerous examples of ubiquitous and interoperable tools and applications are given in the present four LNCS volumes containing the contributions delivered at the 2004 International Conference on Computational Science and its Applications ICCSA 2004 held in Assisi, Italy, May 14-17, 2004 London, Edinburgh and Dublin Philosophical Magazine and Journal of Science, 1871 **Lessons in Elementary Mechanics, Introductory to the Study of Physical Science, Etc** Sir Philip MAGNUS, 1875 **The London, Edinburgh, and Dublin philosophical magazine and journal of science** Naturforschende Gesellschaft in Zürich, 1871
