International Handbook of Comparative Large-Scale Studies in Education Trude Nilsen, Agnes Stancel-Piątak, Jan-Eric Gustafsson, 2022-09-21 This handbook is the first of its kind to provide a general and comprehensive overview of virtually every aspect of International Large Scale Assessment ILSA. It includes historical economic and policy perspectives, theoretical foundations, methodology, and reviews of findings from analyses of ILSA data. After decades during which ILSAs have generated knowledge within central areas of education research and gained increased and substantial impact on educational policy practice and research, such a broad overview for a wide ranging audience is much needed. With contributions from authors and editors from all continents, this handbook appeals to an international audience and keeps a neutral perspective, not favoring one ILSA over another. The handbook is suitable to be read by politicians, researchers, and stakeholders who are seeking an overview of ILSAs, their history and development, and both potential benefits and limitations with regard to policy implications. The reviews of findings from studies analyzing ILSA data will be of interest to stakeholders, teachers, researchers, and policymakers. Considering that the reviews extend to all fields pertaining to educational research, the book will be valuable to all researchers interested in education. Students may use the book to learn about ILSAs in the context of policy, theoretical underpinnings, or research. Moreover, the methodology section is written in a manner that is understandable and accessible for students, stakeholders, or researchers not familiar with these data. This methodology part, however, is also a valuable resource for researchers who are familiar with ILSA data as it provides overviews of the design and sampling procedures of several ILSAs and includes advice on methods of analysis. Even the owners of the ILSAs may find the book valuable as it contains overviews and insights into a number of ILSAs, provides information on how the data is used by the research community, and includes recommendations for future instruments.

Information and Communications

Technology in STEM Education Umesh Ramnarain, Mdutshekelwa Ndlovu, 2023-07-21 This timely book presents the latest scholarly research on the integration of Information Communications Technology (ICT) for enhanced STEM education in African schools and universities. Featuring critical discussion and illustration of key data-led arguments, this volume gives a comprehensive picture of the breadth, complexity, and diversity of issues present in different African countries. It highlights a diverse range of topics such as approaches to ICT integration, the use of digital technologies to support inquiry-based learning, teacher development, and contextual issues in ICT integration for STEM education. Chapters feature contributions and shared experiences from prominent science educators and researchers from across African regions and demonstrate findings and reflections on emerging trends, pedagogical innovations, and research-informed practices on ICT integration in STEM education. Offering cutting-edge research on STEM and digital education in Africa, the book will appeal to researchers, postgraduate students, and scholars in the fields of STEM education, ICT education, digital education, and pedagogy.
