**Distance, Rating Systems and Enterprise Finance** Franz Flögel, 2018-07-27 In response to the credit crunch during the global financial crisis of 2007 2008 many have called for the re establishment of regional banks in the UK and elsewhere In this context Germany's regional banking system with its more than 1 400 small and regional savings banks and cooperative banks is viewed as a role model in the financing of small and medium sized enterprises SMEs However in line with the death of distance debate the universal application of ICT based scoring and rating systems potentially obviates the necessity for proximity to reduce information asymmetries between banks and SMEs calling into question the key advantage of regional banks Utilising novel ethnographic findings from full time participant observation and interviews this book presents intimate insights into regional savings banks and compares their SME lending practices with large nationwide operating commercial banks in Germany The ethnographic

insights are contextualised by concise description of the three pillar German banking system covering bank regulation structural and geographical developments and enterprise finance Furthermore the book advances an original theoretical approach that combines classical banking theories with insights from social studies of finance on the ontological foundation of new realism Ethnographic findings reveal varying distances of credit granting depending on the rating results i e large banks allocate considerable credit granting authority to local staff and therefore challenge the proximity advantages of regional banks Nevertheless by presenting case studies of lending to SMEs the book demonstrates the ability of regional banks to capitalise on proximity when screening and monitoring financially distressed SMEs and explains why the suggestion that ICT can substitute for proximity in SME lending has to be rejected

**The Borders of "Europe"**

Nicholas De Genova, 2017-08-26 In recent years the borders of Europe have been perceived as being besieged by a staggering refugee and migration crisis The contributors to *The Borders of Europe* see this crisis less as an incursion into Europe by external conflicts than as the result of migrants exercising their freedom of movement Addressing the new technologies and technical forms European states use to curb control and constrain what contributors to the volume call the autonomy of migration this book shows how the continent's amorphous borders present a premier site for the enactment and disputation of the very idea of Europe They also outline how from Istanbul to London Sweden to Mali and Tunisia to Latvia migrants are finding ways to subvert visa policies and asylum procedures while negotiating increasingly militarized and surveilled borders Situating the migration crisis within a global frame and attending to migrant and refugee supporters as well as those who stoke nativist fears this timely volume demonstrates how the enforcement of Europe's borders is an important element of the worldwide regulation of human mobility Contributors Ruben Andersson Nicholas De Genova Dace Dzenovska Evelina Gambino Glenda Garelli Charles Heller Clara Lecadet Souad Osseiran Lorenzo Pezzani Fiorenza Picozza Stephan Scheel Maurice Stierl Laia Soto Bermant Martina Tazzioli     State Aid Law and Business Taxation Isabelle Richelle, Wolfgang Schön, Edoardo Traversa, 2016-10-18 This book is a compilation of contributions exploring the impact of the European Treaty provisions regarding state aid on Member States legislation and administrative practice in the area of business taxation Starting from a detailed analysis of the European Courts jurisprudence on Art 107 TFEU the authors lay out fundamental issues e.g. on legal concepts like advantage selectivity and discrimination and explore current problems in particular policy and practice regarding harmful tax competition within the European Union This includes the Member States Code of Conduct on business taxation the limits to anti avoidance legislation and the options for legislation on patent boxes The European Commission's recent findings on preferential rulings are discussed as well as the general relationship between international tax law transfer pricing standards and the European prohibition on selective fiscal aids     *Global Governance of Intellectual Property in the 21st Century* Mark Perry, 2016-05-24 This book analyses the governance foundations of innovation brands inventions secrets and expression which are the keys to a century based on knowledge They are reflected in legal rights that have been fermenting over centuries of national policy deliberations on intellectual property rights constantly in flux in the face of new advances in science but overall a trend towards greater protectionism As countries are challenged by the strictures of international agreements often extorted through imbalanced power relationships they seek their own national means for beneficial differentiation from the new global norms whilst complying with international obligations This book deals with the outcomes of regional governance of intellectual property which often creates ripples in the search for harmony in the laws that form the basis for the future of intellectual property The work has contributions that come from developing and developed nations showing a common theme of the struggle to find the balance in an area of law that often does not provide clearcut solutions to real world environments There are many intellectual property struggles

illustrated in this work patent at the boundaries of nature and invention the need for drug development which is driven by profit based on the patent monopoly copyright the expression of original thought seeking to maximise exposure facilitated by the internet but a system that facilitates rampant copying trade marks supporting company branding seeks to exploit global branding through naming domains names and other areas concomitant to the globalisation of intellectual property governance such as foreign direct investment This book holds up a mirror to the issues of world governance of intellectual property rights in this century asking whether the direction we are currently following is in the best interest of global citizens and showing the divergence that constraints are stimulating on a national level      Capitalism, Democracy, Socialism: Critical Debates Albena Azmanova, James Chamberlain, 2022-09-07

Friedman popularized the latest wave of globalization as a world of giant corporate supply chains that tripled world trade between 1990 and 2010. Major corporations such as Apple, Dell, and GE offshored manufacturing to low cost economies. China became the world's factory, mass producing and exporting computers and gadgets to Western shoppers. This paradigm of globalization has dominated global trade policy making and guided hundreds of billions of dollars in business investments and development spending for almost three decades. But we are now on the cusp of a new era. Revolutionizing World Trade argues that technologies such as ecommerce, 3D printing, 5G, the Cloud, blockchain, and artificial intelligence are revolutionizing the economics of trade and global production, empowering businesses of all sizes to make move and market products and services worldwide and with greater ease than ever before. The twin forces of digitization and trade are changing the patterns, players, politics, and possibilities of world trade and can reinvigorate global productivity growth. However, new policy challenges and old regulatory frameworks are stifling the promise of this most dynamic, prosperous, and inclusive wave of globalization yet. This book uses new empirical evidence and policy experiences to examine the clash between emerging possibilities in world trade and outdated policies and institutions, offering several policy recommendations for navigating these obstacles to catalyze growth and development around the world.

**Chokepoints** Edward Fishman, 2025-02-25 AN INSTANT NEW YORK TIMES BESTSELLER Deftly written Chokepoints is a compelling and dramatic narrative about the new shape of geopolitics. Daniel Yergin, The Wall Street Journal, Remarkable One of the most important books on economic warfare ever written. Paul Kennedy, author of The Rise and Fall of the Great Powers, The epic story of how America turned the world economy into a weapon, upending decades of globalization to take on a new authoritarian axis: Russia, China, and Iran. It used to be that ravaging another country's economy required blockading its ports and laying siege to its cities. Now all it takes is a statement posted online by the U.S. government. In Chokepoints, Edward Fishman, a former top State Department sanctions official, takes us deep into the back rooms of power to reveal the untold history of the last two decades of U.S. foreign policy in which America renounced the gospel of globalization and waged a new kind of economic war. As Vladimir Putin, Xi Jinping, and Ayatollah Khamenei wreaked havoc on the world stage, mavericks within the U.S. government built a fearsome new arsenal of economic weapons, exploiting America's dominance in global finance and technology. Successive U.S. presidents have relied on these unconventional weapons to address the most pressing national security threats, for good and for ill. Chokepoints provides a thrilling account of one of the most critical geopolitical developments of our time, demystifying the complex strategies the U.S. government uses to harness the power of Wall Street, Silicon Valley, and Big Oil against America's enemies. At the center of the narrative is an eclectic group of policy innovators: the diplomats, lawyers, and financial whizzes who've masterminded America's escalating economic wars against Russia, China, and Iran. Economic warfare has become the primary way the United States confronts international crises and counters rivals. Sometimes it has achieved spectacular success; other times, bitter failure. The result we live with today is a new world order.
